TERM STRUCTURE OF INTEREST RATE AND ECONOMIC ACTIVITIES: OECD CASE Assist. Prof. Dr. Erkan KARA,2022-11-11 This study is dedicated to investigating the long run relation between interest rate spreads and economic activities which include industrial production inflation and unemployment rate in OECD countries over the period between 2005 and 2015 by using panel data analysis This study will use the latest panel data models that take structural breaks and cross sectional dependency into account Besides using panel data analysis on this issue this paper will also try to see the effect of new monetary policies that are taking place by major central banks on yield spread and economic activities especially industrial production As it is known that in the post financial crisis of 2008 period major central banks such as the Federal Reserve¹ The FED was the first central bank that started to implement new monetary policies just after the collapse of several large scale investment banks in the U S European Central Bank Bank of Japan and Bank of England have taken action to stimulate the world economy Henceforth not only these major central banks but also other economies started to lower their policy interest rates soon in conventional way These policies pushed interest rates almost to zero and since then the rates have remained very low due to lower output level and disinflationary fears *Green Jobs for Sustainable Development* Ana-Maria Boromisa, Sanja Tišma, Anastasya Ležaić, 2015-06-26 A green economy must be built on green jobs the kind of employment that is low carbon intended to reduce energy use and expected to restore environmental quality But attempts to define exactly what a green job is have led to varied and often contradictory answers There are many unresolved questions including whether we consider jobs in the nuclear fuel industry to be green jobs Or is a worker at a glass making company which supplies the glass for the solar photovoltaic industry doing a green job given that glass making is a dirty industry This book deals with the relationship between green concepts green jobs green economy green growth and sustainable development It examines to which extent creation of green jobs supports overall economic development as opposed to creation of elitist jobs and greenwashing In order to do so general conceptual frameworks for green jobs green economy green growth and green policy are presented as well as their implementation in ten countries selected among the Group of Twenty The selection includes advanced the European Union the United States of America Australia Canada Republic of Korea Japan and developing countries Mexico China Turkey and Brazil The analysis presented in this book shows that although green concept is well intentioned its implementation depends on local circumstances economic political and social Developed countries perceive green growth as a way to create new markets and demand while developing countries rely more on labor intensive growth and less expensive green jobs Thus greening the economy does not diminish differences between rich and poor This book is suitable for those who study and work in Ecological Economics Sustainable Development and Labor Economics How Global Migration Changes the Workforce Diversity Equation Anthony Forsyth, Hina Sheikh, Francesca Sperotti, 2015-06-18 This volume explores some of the ways that a dialogue between diversity researchers

and migration researchers can deepen the understanding of both It moves across economics sociology political science labour relations and legal studies demonstrating that the value of this dialogue cuts across disciplines The book particularly underlines the challenges faced in host societies including exclusion to the point of hyper precarity anti migrant attitudes and the widespread organizationa

Elite Networks Vuk Vuković,2024 Elite Networks presents a new explanatory factor behind the persistence of income inequality extractive political power Elite networks are informal social networks between politicians in power and top executives of politically connected firms where personal ties and long term interactions build trust and loyalty between involved actors Both groups draw benefits from these interactions politicians stay in power and corporate executives extract rents for their firms Firms reward connected executives with higher salaries thus widening the dispersion of earnings in society In Elite Networks Vuk Vukovic offers a different perspective on the long run origins of inequality Calling upon historical arguments and direct empirical evidence Vukovic argues that inequality is not an artifact of a particular economic system but a man made phenomenon rooted deeply within the often violent quest for political power Further he theoretically and empirically establishes the impact elite networks have on higher inequality Offering a unique contribution to the field this book argues that to lower inequality and prevent incentives of elite network formation we must first and foremost lower centralized political power and re empower the citizens and the community by rebuilding trust and relying on the democratic trial and error mechanism
