Your abstract body may have:

- **MAXIMUM CHARACTER COUNT**: 2,250 characters (that does not include title, authors and affiliations, tables and graphics; spaces are not counted)
- **MINIMUM CHARACTER COUNT**: 250 characters
- **TABLE PENALTY**: 100 characters penalty for each table

Select the Research Category which is the best fit for the research described in your abstract. The categories (and their definitions) are as follows:

BASIC SCIENCE: A research study conducted within the basic science of medicine, including but not limited to bench top laboratory projects such as biochemical or histological studies, animal model or cadaveric studies. Projects in this category typically require a well-defined study design and hypothesis, and usually include a control group. Basic science abstracts are eligible for oral or poster presentation.

CLINICAL SCIENCE: A prospective or retrospective study that evaluates an interventional diagnostic or therapeutic modality in a group of patients or research subjects (examples: evaluations of medical devices, drug therapies, or procedural modalities). Studies that involve collection of data obtained from review of medical records or review of other clinical information, such as diagnostic data, also qualify in this category. These projects represent observational studies in which the investigator records or abstracts events in a large series of patients without altering patient management. Studies in these areas usually require a specific hypothesis, a scientific study design, appropriate biostatistics, and if applicable, a control group. Clinical Science abstracts are eligible for oral or poster presentation.

MEDICAL EDUCATION: A prospective or retrospective project that evaluates an educational modality. The educational endeavor can be directed toward medical students, residents, faculty, or patients. These studies require background information on the educational topic and its importance to medical education. The design of the project, results (with appropriate statistics or other data), and conclusions must also be detailed. If applicable, control groups should be used. Medical Education abstracts are eligible for oral or poster presentation.

CASE REPORTS WITH LITERATURE REVIEW: Case reports include descriptions of rare or unusual clinical conditions, atypical manifestations of common disorders, or routine clinical problems for which a novel diagnostic or therapeutic modality has been devised. Case reports should include a review of pertinent literature on the topic. Literature reviews involve an extensive review of the current medical literature pertaining to a narrow clinical topic. Case Report abstracts are eligible for poster presentation only.
