The SAGE Handbook of Personality and Individual Differences Virgil Zeigler-Hill, Todd K. Shackelford, 2021-08-04

The examination of personality and individual differences is a major field of research in the modern discipline of psychology. Concerned with the ways humans develop an organised set of characteristics to shape themselves and the world around them, it is a study of how people come to be different and similar to others on both an individual and a cultural level. The SAGE Handbook of Personality and Individual Difference is the broadest and most comprehensive overview of the field to date. With outstanding contributions from leading scholars across the world, this is an invaluable resource for researchers and graduate students. Its three volumes cover all of the central concepts, domains and debates of this globally expanding discipline, including the core theoretical perspectives, research strategies as well as the origins, applications and measurement of personality and individual difference.

Engineering and Logistics Handbook Erick C. Jones, 2019-11-12 This handbook begins with the history of Supply Chain SC Engineering; it goes on to explain how the SC is connected today and rounds out with future trends. The overall merit of the book is that it introduces a framework similar to sundial that allows an organization to determine where their company may fall on the SC Technology Scale. The book will describe those who are using more historic technologies, companies that are using current collaboration tools for connecting their SC to other global SCs and the SCs that are moving more towards cutting edge technologies. This book will be a handbook for practitioners, a teaching resource for academics and a guide for military contractors. Some figures in the eBook will be in color. Presents a decision model for choosing the best Supply Chain Engineering SCE strategies for Service and Manufacturing Operations with respect to Industrial Engineering and Operations Research techniques. Offers an economic comparison model for evaluating SCE strategies for manufacturing outsourcing as opposed to keeping operations in house. Demonstrates how to integrate automation techniques such as RFID into planning and distribution operations. Provides case studies of SC inventory reductions using automation from AIT and RFID research. Covers planning and scheduling as well as transportation and SC theory and problems.
