Standards, Rationale, and Assessment Method:**Critical Area: Polynomial, Rational, and Radical Relationships**

Rationale: The following Common Core State Standards have been selected as critical areas because they are identified as major focus standards for the Algebra II course. In addition, these algebraic skills and concepts have relevance and applications that are essential for success in college and career readiness.

Standards:

- N-CN.1:** Know there is a complex number i such that $i^2 = -1$, and every complex number has the form $a + bi$ with a and b real.
- N-CN.2:** Use the relation $i^2 = -1$ and the commutative, associative, and distributive properties to add, subtract, and multiply complex numbers.
- N-CN.3:** Solve quadratic equations with real coefficients that have complex solutions.
- A-SSE.1:** Interpret expressions that represent a quantity in terms of its context.
- A-SSE.2:** Use the structure of an expression to identify ways to rewrite it. For example, use $x^2 + 6x + 8 = (x + 2)(x + 4)$, thus recognizing it as a difference of squares that can be factored as $(x^2 + 6x + 9) - 5 = (x + 3)^2 - 5$.
- A-SSE.3:** Derive the formula for the sum of a finite geometric series (when the common ratio is not 1), and use the formula to solve problems. For example, calculate mortgage payments.
- A-APR.1:** Understand that polynomial forms a system analogous to the integers; namely, they are closed under the operations of addition, subtraction, and multiplication; add, subtract, and multiply polynomials.
- A-APR.2:** Know and apply the Remainder Theorem: For a polynomial $p(x)$ and a number a , the remainder on division by $x - a$ is $p(a)$, so $p(x) = 0$ if and only if $(x - a)$ is a factor of $p(x)$.
- A-APR.3:** Identify zeros of polynomials when suitable factorizations are available, and use the zeros to construct a rough graph of the function defined by the polynomial.
- A-APR.4:** Rewrite simple rational expressions in different forms; write $\frac{r(x)}{q(x)}$ in the form $g(x) + \frac{r(x)}{q(x)}$, where $q(x)$, $h(x)$, $g(x)$, and $r(x)$ are polynomials with the degree of $r(x)$ less than the degree of $h(x)$, using inspection, long division, or, for the more complicated examples, a computer algebra system.
- A-REI.1:** Solve simple rational and radical equations in one variable, and give examples showing how extraneous solutions may arise.
- A-REI.2:** Explain why the x -coordinates of the points where the graphs of the equations $y = f(x)$ and $y = g(x)$ intersect are the solutions of the equation $f(x) = g(x)$; find the solutions approximately, e.g., using technology to graph the functions, make tables of values, or find successive approximations. Include cases where $f(x)$ and/or $g(x)$ are linear, polynomial, rational, absolute value, exponential, and logarithmic functions.
- F-BF.1:** Analyze functions using different representations.

Focused Mathematical Practice Standards:

- MP 1:** Make sense of problems and persevere in solving them.
- MP 8:** Construct viable arguments and critique the reasoning of others.
- MP 5:** Use appropriate tools strategically.
- MP 6:** Attend to precision.
- MP 7:** Look for and make use of structure.

A PRACTICAL APPROACH TO USING LEARNING STYLES IN MATH INSTRUCTION

Ruby Bostick Midkiff, Rebecca Davis Thomasson, 1994-01-01 Although much attention has been given to the use of learning styles in the general curriculum and in teaching students to read the use of learning styles based instruction in the mathematics classroom has received limited attention Therefore the purpose of this book is to address the improvement of mathematics instruction through the use of learning styles based instruction Its goals are to give the reader an understanding of learning styles based instruction in mathematics of effective use of manipulatives in teaching various concepts at all grade levels of ways to develop spatial reasoning skills in students of different activities which accommodate a variety of learning styles and of authentic assessment in mathematics The book presents the use of learning styles based instruction as a powerful strategy which teachers can and should use with the result that teaching will be more effective less remediation will be necessary and the overall mathematics curriculum will be enhanced Teacher Evaluation in Music

Cara Faith Bernard, Joseph Michael Abramo, 2019-01-04 *Teacher Evaluation in Music A Guide for Music Teachers in the U S* aims to help music teachers navigate the controversial terrain of teacher evaluation Rather than entering the debate on policy divorced from practice this book is intended as a pragmatic approach to help music teachers to thrive within teacher evaluation systems and as a way to improve practice Using Shulman's concept of content knowledge general pedagogical knowledge and pedagogical content knowledge this book strives to help music teachers find a balance between advocating for themselves and their programs and for using teacher evaluation to improve their teaching The book covers history of policy and law of teacher evaluation and the competing uses of teacher evaluation to rate teachers or as a professional development tool The descriptions of policies laws and competing uses are approached in a way to help music teachers use teacher evaluation for their benefit to grow as professionals This book has chapters devoted to giving detailed and specific strategies in key areas that research has suggested music teachers struggle to implement questioning literacy differentiated instruction and assessment Complimenting these key areas are sample lesson plans which apply the strategies of questioning differentiation literacy and assessment discussed in each chapter These lessons serve as a resource and guide for teachers to develop their own lessons and improve their practice The final chapter gives guidance on how music teachers may talk to administrators and evaluators to make teacher evaluation productive Through these detailed descriptions of understanding teacher evaluation talking to evaluators and improving practice music teachers may not just survive but thrive in these systems of accountability *Math Instruction for Students with Learning Problems* Susan Perry Gurganus, 2017-02-24 *Math Instruction for Students with Learning Problems* Second Edition provides a research based approach to mathematics
