

COMMUNITY HEALTH NEEDS ASSESSMENT

FINAL SUMMARY REPORT

I. EXECUTIVE SUMMARY

The Tri-County Health Assessment Collaborative, consisting of hospitals, health systems, and health departments within Burlington, Camden, and Gloucester Counties came together to undertake a comprehensive regional community health needs assessment (CHNA). The Tri-County Collaborative included the following partners: Cooper University Health Care, Kennedy Health System, Lourdes Health System, Inspira Medical Center-Woodbury, Virtua Health, and the Health Departments of Burlington, Camden and Gloucester Counties. The CHNA was conducted from September 2012 to June 2013. The purpose of the assessment was to gather information about local health needs and health behaviors. The assessment examined a variety of indicators including risky health behaviors and chronic health conditions.

This CHNA Final Summary Report serves as a compilation of the overall findings of each research component. Detailed reports for each individual component were provided separately. The completion of the CHNA enabled Cooper University Health Care and its partners to take an in-depth look at the greater community. The assessment was conducted to comply with requirements set forth in the Affordable Care Act, as well as to further the hospital's commitment to community health and population health management. The findings from the assessment were utilized by Cooper to prioritize public health issues and develop a community health implementation plan focused on meeting community needs.

Research Components

The CHNA Collaborative took a comprehensive approach to identifying the needs in the communities it serves. A variety of quantitative and qualitative research components were implemented as part of the CHNA. These components included the following:

- Secondary Statistical Data Profile of Camden County
- Household Telephone Survey with 575 community residents
- Key Informant Interviews with 113 community stakeholders
- Focus Group Discussions with 22 community residents

Key Community Health Issues

The following community health issues appeared in multiple research components:

- Access to Health Care
- Mental Health & Substance Abuse
- Chronic Health Conditions

Recent Developments in Chinese Urban Planning

Qisheng Pan, Jason Cao, 2015-08-27 This book provides a comprehensive overview of the most recent development of Chinese cities It discusses a broad range of subjects of urban planning including environmental planning transportation planning historical preservation economic development geographic information systems GIS and other technological applications China the most populous country in the world has experienced unprecedented urbanization in a relatively short period During the past decades urbanization in China has centered on land development through industrialization and investment but it has largely ignored the prosperity and well being of the people Livable cities are not just those with magnificent buildings and infrastructure they are great places where people want to live China's recently inaugurated leaders have proposed a new model to actively and prudently enhance the quality of urbanization through compact intelligent and low carbon development It symbolizes the departure from land centered urban development to a form of people oriented urbanization as China's Premier Li Keqiang has advocated This new model offers a platform for planning researchers and

practitioners to tackle urbanization challenges such as social equity environment energy ecological and historic preservation affordable housing and externalities of mega cities Furthermore people oriented urbanization calls for public participation and stakeholder engagement in the planning process This book brings together planners designers scholars scientists and government officials from China and all over the world to exchange ideas on urban regeneration **Community Health**
