

ECON0019: QUANTITATIVE ECONOMICS AND ECONOMETRICS

EMPIRICAL PROJECT 2024

Instructions

The mark for the empirical project is worth 20% of your total mark for the module.

Please follow these instructions so that we can ensure anonymity in marking and ensure compliance with UCL assessment policies. We will only be able to give you credit for your project if you follow these instructions. If the instructions are not followed, you will receive a mark of zero.

1. Please elect **one group member to submit** the project for the group.
2. **All answers must be uploaded via Moodle by 12pm on March 27, 2024.**
3. **All marking is anonymised. Do not put your name or student number or group name anywhere on your submitted answer — either in the document or in the file name.**
4. You should submit **one PDF or Word document** that includes: your answers and explanations in the main text (including tables and figures, if any), as well as **an appendix with your code** producing the results. If you use software other than Stata, you should state which programme was used. You may optionally include raw statistical output (e.g. Stata log-file) after the code but such output does not substitute for your answers and explanations.
5. Your answers should be no more than 800 words, including footnotes but excluding tables, figures, and the code appendix. You must **state the number of words** at the top of the first page of your submission.
6. Submissions will be checked for plagiarism. By submitting this assessment, you pledge your honour that you have not violated UCL's Assessment Regulations which are detailed in <https://www.ucl.ac.uk/academic-manual/chapters/chapter-6-student-casework-framework/section-9-student-academic-misconduct-procedure>, which include (but are not limited to) plagiarism, self-plagiarism, unauthorised collaboration between students, sharing my assessment with another student or third party, access another student's assessment, falsification, contract cheating, and falsification of extenuating circumstances.
7. Please make sure to allow sufficient time should problems arise with Turnitin. Check the submission inbox for confirmation that your essay has been submitted. Once your submission has been accepted you will return to the 'My Submissions' tab where you will be able to see the details of your submission. If your submission is not confirmed for some reason, or you are having issues uploading the document, get in touch with ISD (servicedesk@ucl.ac.uk) as soon as possible to figure out what the problem might be.

Sample Econometric Project Papers

J.J. Heckman, Edward Leamer

Sample Econometric Project Papers:

Selected Papers Of Lawrence R Klein: Theoretical Reflections And Econometric Applications Kanta

Marwah,1997-06-01 This volume contains selected papers of Lawrence R Klein in economics econometric theory and applications in modeling forecasting macroeconomic analysis international economics and public policy Nobel Laureate Lawrence Klein s bibliography spans a half century including books articles and chapters in conference proceedings festschriften and thematic books One such volume of solely scientific collections mainly from his relatively early articles has already been published The present volume is different it includes some articles but largely chapters or book excerpts that were mostly written since 1980 the approximate cut off date of the prior volume and the year of his Nobel Prize Also it includes things that were published in very limited or obscure editions Thus it provides a more complete picture of his scholarly career and his current reflections on the state of economic science All these writings are in the vanguard of thinking about economics in a global domain The thirty five plus selections are organized in five parts by major themes An editorial commentary introduces each part The introductory chapters include Klein s autobiographical research commentary and his professional life philosophy *Research Paper PNW.* ,1978 **A History of Econometrics** Duo Qin,2013-07-25 Written from the Haavelmo Cowles Commission econometric perspective this book provides an account of the advances in the field of econometrics since the 1970s **Principles of Econometrics** R. Carter Hill,William E. Griffiths,Guay C. Lim,2018-02-21 Principles of Econometrics Fifth Edition is an introductory book for undergraduate students in economics and finance as well as first year graduate students in a variety of fields that include economics finance accounting marketing public policy sociology law and political science Students will gain a working knowledge of basic econometrics so they can apply modeling estimation inference and forecasting techniques when working with real world economic problems Readers will also gain an understanding of econometrics that allows them to critically evaluate the results of others economic research and modeling and that will serve as a foundation for further study of the field This new edition of the highly regarded econometrics text includes major revisions that both reorganize the content and present students with plentiful opportunities to practice what they have read in the form of chapter end exercises Continuous-Time Econometrics G. Gandolfo,2012-12-06 Continuous time econometrics is no longer an esoteric subject although most still regard it as such so much so that it is hardly mentioned in standard textbooks on econometrics Thanks to the work done in the last 20 years both the theoretical and the applied side are by now well developed Methods of estimation have been theoretically elaborated and practically implemented through computer programs Continuous time macroeconomic models for different countries have been constructed estimated and used Being myself involved in these developments it was with great pleasure that I accepted the invitation to organize a session on continuous time econometrics in the context of the International Symposium on Economic Modelling jointly organized by the University of Urbino and the book series International Studies in Economic

Modelling and co sponsored by the Consiglio Nazionale delle Ricerche The reaction of continuists from all over the world was so enthusiastic that I was able to arrange two sessions one on the theory and the other on the applications The symposium was held in Urbino on 23-25 July 1990 The papers presented in Urbino have been revised in the light of the discussion at the symposium and the referees comments Hence what is published here should become another standard reference in the field of continuous time econometrics

Handbook of Econometrics Zvi Griliches, Michael D. Intriligator, 1983 The Handbook is a definitive reference source and teaching aid for econometricians It examines models estimation theory data analysis and field applications in econometrics Comprehensive surveys written by experts discuss recent developments at a level suitable for professional use by economists econometricians statisticians and in advanced graduate econometrics courses

The Economics and Econometrics of Innovation David Encaoua, Bronwyn H. Hall, François Laisney, Jacques Mairesse, 2013-03-09

During the past few decades the interest of economists in the sources of long term economic growth has led an increasing number of them to focus on the role of innovation in creating that growth Although some researchers have always been interested in this topic the groundbreaking work of Solow 1957 Nelson 1959 and Arrow 1962 made many other economists recognize the central role played by innovation in almost all spheres of economic activity The Economics and Econometrics of Innovation presents a valuable overview of the work of the world's most renowned experts in the field of innovation and technical change It collects 22 outstanding contributions that reflect the results of the vast worldwide research efforts and remind us of the importance of economic incentives in shaping and directing innovative activities The volume presents an edited selection of papers that were first presented at the 10th International ADRES conference One particular goal of this book is to bring out the complementary nature of the various approaches to innovation and to facilitate in depth dialogues both between microeconomists and macroeconomists and between theoreticians and econometricians General topics that are considered range from the economy wide effects of innovation on growth and employment to the variation of individual firm innovative performance from the analysis of networks and standardization to the role of intellectual property rights and the assessment of knowledge spillovers Besides the wealth of information presented in the chapters readers of this volume will also appreciate the value of examining a single question from different angles and by using different methods

U.S. Government Research Reports, 1960

The Econometrics of Networks Áureo de Paula, Elie Tamer, Marcel-Cristian Voia, 2020-10-19 Showcasing fresh methodological and empirical research on the econometrics of networks and comprising both theoretical empirical and policy papers the authors in this volume bring together a wide range of perspectives to facilitate a dialogue between academics and practitioners for better understanding this groundbreaking field

Energy Research Abstracts, 1979

Handbook of Econometrics J.J. Heckman, Edward Leamer, 2001-11-22 The Handbook is a definitive reference source and teaching aid for econometricians It examines models estimation theory data analysis and field applications in econometrics Comprehensive surveys written by experts discuss recent developments at a level suitable for

professional use by economists econometricians statisticians and in advanced graduate econometrics courses For more information on the Handbooks in Economics series please see our home page on <http://www.elsevier.nl/locate/hes> **Progress in Sustainable Development Research** Roberto Antonio Lopez,2008 This book presents new and important research advances in the field of sustainable development which has been defined as balancing the fulfilment of human needs with the protection of the Natural environment so that these needs can be met not only in the present but in the indefinite future The term was used by the Brundtland Commission which coined what has become the most often quoted definition of sustainable development as development that meets the needs of the present without compromising the ability of future generations to meet their own need The field of sustainable development can be conceptually broken into four constituent parts environmental sustainability economic sustainability social sustainability and political sustainability **Advances in**

Economics and Econometrics: Volume 3, Econometrics Daron Acemoglu,Manuel Arellano,Eddie Dekel,2013-05-13 This is the third of three volumes containing edited versions of papers and commentaries presented at invited symposium sessions of the Tenth World Congress of the Econometric Society held in Shanghai in August 2010 The papers summarize and interpret key developments in economics and econometrics and they discuss future directions for a wide variety of topics covering both theory and application Written by the leading specialists in their fields these volumes provide a unique accessible survey of progress on the discipline The first volume primarily addresses economic theory with specific focuses on nonstandard markets contracts decision theory communication and organizations epistemics and calibration and patents

Report summaries United States. Environmental Protection Agency,1983 **Forest Service Research Paper NE.**,1978 *Econometric Studies* Joachim Frohn,2001 **Handbook of Computational Econometrics** David A. Belsley,Erricos Kontoghiorghes,2009-08-18 Handbook of Computational Econometrics examines the state of the art of computational econometrics and provides exemplary studies dealing with computational issues arising from a wide spectrum of econometric fields including such topics as bootstrapping the evaluation of econometric software and algorithms for control optimization and estimation Each topic is fully introduced before proceeding to a more in depth examination of the relevant methodologies and valuable illustrations This book Provides self contained treatments of issues in computational econometrics with illustrations and invaluable bibliographies Brings together contributions from leading researchers Develops the techniques needed to carry out computational econometrics Features network studies non parametric estimation optimization techniques Bayesian estimation and inference testing methods time series analysis linear and nonlinear methods VAR analysis bootstrapping developments signal extraction software history and evaluation This book will appeal to econometricians financial statisticians econometric researchers and students of econometrics at both graduate and advanced undergraduate levels **Computational Approaches to Economic Problems** Hans M. Amman,B. Rustem,Andrew B. Whinston,2013-03-09 This volume contains a selection of papers presented at the first conference of the Society for

Computational Economics held at ICC Institute Austin Texas May 21 24 1995 Twenty two papers are included in this volume devoted to applications of computational methods for the empirical analysis of economic and financial systems the development of computing methodology including software related to economics and finance and the overall impact of developments in computing The various contributions represented in the volume indicate the growing interest in the topic due to the increased availability of computational concepts and tools and the necessity of analyzing complex decision problems The papers in this volume are divided into four sections Computational methods in econometrics Computational methods in finance Computational methods for a social environment and New computational methods LIST

Contributions to Econometric Theory and Application R.A.L. Carter,J. Dutta,A. Ullah,2012-12-06 The purpose of this volume is to honour a pioneer in the field of econometrics A L Nagar on the occasion of his sixtieth birthday Fourteen econometricians from six countries on four continents have contributed to this project One of us was his teacher some of us were his students many of us were his colleagues all of us are his friends Our volume opens with a paper by L R Klein which discusses the meaning and role of exogenous variables in structural and vector autoregressive econometric models Several examples from recent macroeconomic history are presented and the notion of Granger causality is discussed This is followed by two papers dealing with an issue of considerable relevance to developing countries such as India the measurement of the inequality in the distribution of income The paper by C T West and H Theil deals with the problem of measuring inequality of all components of total income within a region rather than just labour income It applies its results to the regions of the United States The second paper in this group by N Kakwani derives the large sample distributions of several popular inequality measures thus providing a method for drawing large sample inferences about the differences in inequality between regions The techniques are applied to the regions of Cote d Ivoire The next group of papers is devoted to econometric theory in the context of the dynamic simultaneous linear equations model The first by P J **Economic Modelling at the Bank of England** G. B. Henry,2013-03-12 J S FLEMMING The Bank of England s role as a leading central bank involves both formal and informal aspects At a formal level it is an adviser to HM Government whilst at an informal level it is consulted by domestic and overseas institutions for advice on many areas of economic interest Such advice must be grounded in an understanding of the workings of the domestic and international economy a task which becomes ever more difficult with the pace of change both in the economy and in the techniques which are used by professional economists to analyse such changes The Bank s economists are encouraged to publish their research whenever circumstances permit whether in refereed journals or in other ways In particular we make it a rule that the research underlying the Bank s macroeconomic model to which outside researchers have access through the ESRC Economic and Social Research Council macromodelling bureau should be adequately explained and documented in published form This volume expands the commitment to make research which is undertaken within the Economics Division of the Bank of England widely available Included here are

chapters which illustrate the breadth of interests which the Bank seeks to cover Some of the research is as would be expected directly related to the specification of the Bank s model but other aspects are also well represented

Whispering the Secrets of Language: An Mental Journey through **Sample Econometric Project Papers**

In a digitally-driven earth where monitors reign great and quick interaction drowns out the subtleties of language, the profound strategies and mental nuances hidden within phrases often go unheard. Yet, set within the pages of **Sample Econometric Project Papers** a interesting literary value sporting with natural emotions, lies a fantastic quest waiting to be undertaken. Composed by a talented wordsmith, this wonderful opus invites readers on an introspective journey, delicately unraveling the veiled truths and profound affect resonating within ab muscles cloth of each word. Within the mental depths of the moving review, we shall embark upon a honest exploration of the book is primary subjects, dissect their captivating writing style, and fail to the effective resonance it evokes serious within the recesses of readers hearts.
