Antenna Design for CubeSats Reyhan Baktur, 2021-12-31 A CubeSat is a miniaturized modular satellite that can be constructed from off the shelf components With advancements in digital signal processing power electronics and packaging technology it is feasible to fit science instruments and communication devices that were traditionally carried on larger satellites on CubeSat constellations This not only reduces mission cost repair risk but also provides more precise and real time science data Their low cost and versatility allow for CubeSats to be used to test technologies that are planned to use on larger satellites to collect point to point data in space when launched as CubeSat constellations or to monitor health of larger spacecrafts This comprehensive reference explores CubeSat standards launching methods and detailed design guidelines for antennas specially made for CubeSat applications Deployed CubeSat antennas such as low gain antennas high gain wire based antennas and horn and dish antennas as they relate to the technology are explored Conformal CubeSat Antennas including those that are independent of CubeSats and those integrated in CubeSat solar panels are discussed An antenna design guideline is provided to demonstrate the basics of a CubeSat link budget which is transitionally published in signal and system community Written by an expert in the field this book enables readers to read antenna specifics when choosing

Travelling Through Education Ole Skovsmose,2005-01-01 This is a personal notebook from a conceptual travel But in a different sense it also represents a report on travelling The main part of the manuscript was written in Brazil Denmark and England whilst notes have also been inspired by visits to other countries So the book not only represents conceptual travel it also reflects seasons of real travelling In Part 1 the book comments on the critical position of mathematics education and also indicates some concerns of critical mathematics education Part 2 comments on mathematics in action and considers the discussion of mathematics as an applied discipline in the contexts of technology management engineering economics etc In Part 3 the book comments on mathematics and science in general These comments are then generalised into a discussion of reason and of the apparatus of reason Finally Part 4 returns to the discussion of mathematics education and comments on notions that could become sensitive to the critical position of mathematics education Ole Skovsmose is also travelling between different academic fields He touches upon mathematics and mathematics education the philosophy of mathematics technology and science as well as sociological issues glancing over issues such as globalisation ghettoising learning society and risk society Travelling with the author the reader will become aware of connections between many of these different issues **The Transparent Society** David Brin,1999-05-07 Argues that the privacy of individuals actually hampers

Steven J. Brams,2009-12-02 Voters today often desert a preferred candidate for a more viable second choice to avoid wasting their vote Likewise parties to a dispute often find themselves unable to agree on a fair division of contested goods In **Mathematics and Democracy** Steven Brams a leading authority in the use of mathematics to design decision making processes shows how social choice and game theory could make political and social institutions more democratic Using mathematical analysis he develops rigorous new procedures that enable voters to better express themselves and that allow disputants to divide goods more fairly One of the procedures that Brams proposes is approval voting which allows voters to vote for as many candidates as they like or consider acceptable There is no ranking and the candidate with the most votes wins The voter no longer has to consider whether a vote for a preferred but less popular candidate might be wasted In the same vein Brams puts forward new more equitable procedures for resolving disputes over divisible and indivisible goods

Terahertz Metrology Mira Naftaly,2015-01-01 This new book describes modern terahertz THz systems and devices and presents practical techniques for accurate measurement with an emphasis on evaluating uncertainties and identifying sources of error This is the first THz book on the market to address measurement methodologies and issues perfect for practitioners and aspiring practitioners wishing to learn good measurement practice and avoid pitfalls This book provides a brief review of different THz systems and devices followed by chapters detailing the measurement issues encountered in using each of the main types of THz systems and a guide to performing measurements rigorously Particular attention is given to evaluating uncertainties and recognizing potential sources of errors The main focus is on time domain spectroscopy by far the most widely used technique Readers are also presented with examples of applications with the emphasis on utility both in research and in industry **Transparent Data Mining for Big and Small Data** Tania Cerquitelli,Daniele Quercia, Frank Pasquale,2017-05-09 This book focuses on new and emerging data mining solutions that offer a greater level of transparency than existing solutions Transparent data mining solutions with desirable properties e g effective fully automatic scalable are covered in the book Experimental findings of transparent solutions are tailored to different domain experts and experimental metrics for evaluating algorithmic transparency are presented The book also discusses societal effects of black box vs transparent approaches to data mining as well as real world use cases for these approaches As algorithms increasingly support different aspects of modern life a greater level of transparency is sorely needed not least because discrimination and biases have to be avoided With contributions from domain experts this book provides an overview of an emerging area of data mining that has profound societal consequences and provides the technical background to for readers to contribute to
