

A pair of trapezoids are made of the 12 trapezoid that Jackson made to cover a reflecting surface that is the size of the city square. The top width of this trapezoid is 24 inches and the bottom width is 48 inches. What is the height of the trapezoid?

The green height of the trapezoid is given to be 6 feet.

Show to solve for the height of the trapezoid

We have to solve for this by making use of the height of a trapezoid. The height is given as:

$$A = \frac{1}{2}(b_1 + b_2)h$$

The variables here are:

$$h = \text{height}$$

$$b_1 = \text{length of base 1}$$

$$b_2 = \text{length of base 2}$$

If the trapezoid that we have is a similar triangle, then base 1 is going to be the same length as that of the first base.
