economic fundamentals need to be reconsidered in order to regain stability in the global marketplace One such consideration is the failing dynamics of the international tax infrastructure Neoliberalism 2.0 brings a 21st century assessment of the Pigovian taxes considering a completely new calibration of the international tax systems inspired by the historically developed Pigovian tax model The book considers the impact neoliberalism had and will have on regulatory infrastructure democracy in an era of globalization and reduced legitimation of the national state The Pigovian model brings home the often forgotten relationship between taxation as a part of the regulatory sphere macro economics and the political philosophical context in which law and economics emerge The model also takes into account the phenomena of globalization and financialization and is tested using the financial sector as an example This book addresses the many challenges a Pigovian shift would imply for the sovereign and its national economies Neoliberalism 2.0 demonstrates the ability to design a paradigm changing alternative to the current tax infrastructure while taking into account a low economic growth environment of the future the implications of globalization and the changing relationship between citizens and their state

Intellectual Property Excesses Enrico Bonadio, Aislinn O'Connell, 2022-06-30 This collection of essays highlights the sometimes absurd outcomes which an unjustified overprotection of intellectual property IP may lead to It collects and comments on a series of IP disputes which have taken the notion of IP protection to extremes From individuals being sued for hundreds of thousands of dollars for sharing a playlist to sports spectators being arrested for wearing the wrong dresses passing through granting patents for inventions obtained by misappropriating traditional knowledge and trademark protection of merely descriptive signs this book brings together a broad range of examples from across the IP spectrum where protection and enforcement have been used or threatened on unreasonable and or untenable grounds The aim of the book is to criticise these excesses precisely because they harm IP and because they contribute to creating an environment where more and more people are led to hate IP and view it as a protectionist regime which discourages creativity in innovation and ends up safeguarding the owners of monopolistic rights which restrict trade competition and people's freedom This is not therefore a book against IP it is instead a call for change and an attempt to save IP through critiquing its excesses and preventing such a fascinating area of law from continuing to be an easy target for criticism The book includes a foreword by Jason Mazzone Albert E Jenner Jr Professor of Law at the University of Illinois USA
