Transportation Engineering C. Jotin Khisty, 1991      **Lab and Field Manual for Transportation Engineering** C. Jotin Khisty, Michael D. Kyte, 1991      Bridges George C. Lee, Ernest Sternberg, 2015-02-23 A multidisciplinary and accessible introduction to humanity's favorite structure the bridge Whether you are a student considering a career in civil engineering and transportation planning a public official interested in the future of infrastructure or a person who simply cares about bridges this book offers an accessible and illustrated introduction to the most beloved feature of our built environment Learn about engineering basics the forces that bridges must resist to stay aloft and the principles by which engineers decide which types of bridges make sense at which sites Find out how engineers protect bridges from their greatest threats the earthquakes floods and other hazards that can cause catastrophic damage Moving from engineering to planning learn how we decide whether a bridge is worth building in the first place learn about controversial features of cost benefit analysis and about the transportation models by which planners forecast bridge effects on traffic patterns Investigate a sometimes intractable problem why a project often creeps along for a decade or more to get from initial studies to the day the ribbon is cut undergoing vast cost escalations Also explore the environmental impact of bridges and the meaning of a sustainable bridge and whether bridges could once again be built like ancient Roman ones to last a thousand years Authoritative comprehensive and fun to read this book is for everyone interested in bridges from the lay reader to the techie who likes to see how things work It also will serve as an excellent companion to beginning design students in architecture and engineering and it should be on the shelf of civil engineers architects and contractors too Robert E Paaswell City College of New York This work will help educated but nonspecialist decision makers to appreciate the complexity of bridge design construction and maintenance in making decisions that impact bridges Niraj Verma Virginia Commonwealth University
