

ARE THEY READY? PRINCIPALS' PERCEPTIONS OF THEIR PREPAREDNESS TO LEAD SCHOOL IMPROVEMENT EFFORTS

Dr. Janna Fisher, College of Education, University of North Carolina, Chapel Hill
Janna.Fisher@unc.edu

TOPIC: PRINCIPAL PROFESSIONAL DEVELOPMENT

PROBLEM STATEMENT

Principal leadership is correlated with student achievement, and there are significant links between specific principal behaviors and student achievement (Petersen et al., 2010; Tang et al., 2018). Researchers posit that "effective leadership means more than knowing what to do—it's knowing when, how, and why to do it" (Petersen et al., 2010, p. 2). However, there is limited research on the principal, as a learner, specifically principal professional development, and its impact on principal leader effectiveness (Garcia, 2014).

Researchers can identify the types of professional development experiences that are most likely to build principals' capacity to be successful leaders, negative retention trends and stagnant student achievement may be reversed.

PURPOSE OF THE STUDY

The purpose of this research is to explore the perceptions of principals regarding their preparedness to lead school improvement efforts. The research will seek to identify the types of professional development experiences that are most likely to build principals' capacity to be successful leaders, negative retention trends and stagnant student achievement may be reversed.

RESEARCH QUESTIONS

1. How do principals perceive their preparedness to lead school improvement efforts?
2. What types of professional development experiences are most likely to build principals' capacity to be successful leaders?
3. How do principals perceive their preparedness to lead school improvement efforts?

POPULATION AND METHODOLOGY

The research population will consist of principals who are currently serving in the role of principal in the state of North Carolina. The research will seek to identify the types of professional development experiences that are most likely to build principals' capacity to be successful leaders, negative retention trends and stagnant student achievement may be reversed.

BACKGROUND

The role of the principal is a complex one, and it is one that is constantly evolving. In the past, the principal was seen as the person who was responsible for the day-to-day operations of the school. However, in the 21st century, the principal is now seen as the person who is responsible for the long-term success of the school. This role is often described as being that of a "change agent" or a "visionary leader".

IMPORTANCE OF SCHOOL LEADERSHIP

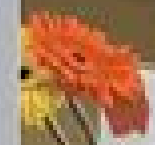

The importance of school leadership is often underestimated. In fact, it is one of the most critical factors in determining the success or failure of a school. A strong leader can inspire and motivate staff, set a clear vision, and ensure that the school is on track to achieve its goals.

SIGNIFICANCE

The significance of this research is that it will provide a better understanding of the role of the principal in the 21st century. It will also provide a better understanding of the types of professional development experiences that are most likely to build principals' capacity to be successful leaders. This research is important because it will help to ensure that principals are equipped with the skills and knowledge they need to lead their schools effectively.

LITERATURE REVIEW

There is a growing body of research on the role of the principal in the 21st century. This research has shown that principals who are effective in their role are those who are able to inspire and motivate staff, set a clear vision, and ensure that the school is on track to achieve its goals. This research is important because it will help to ensure that principals are equipped with the skills and knowledge they need to lead their schools effectively.
