Selenium Automation Framework (SAF).

Quicker, more reliable test automation

Automation technologies improve test coverage and yield higher quality products. They save thousands of manual test execution hours, significantly reducing costs. SAF is a customized framework developed using Selenium, a widely accepted web application automation tool. It shrinks test cycle times and related costs. Selenium is a portable software testing framework for web applications. The tests can be written as HTML tables or coded in a number of popular programming languages. They can be run directly in most modern web browsers. Selenium can be deployed on Windows, Linux and Macintosh.

SAF framework

SAF increases automation efficiency by minimizing initial coding effort. It is a script-less framework used for test automation of web applications that are developed on .Net, Java / J2EE, AJAX. The framework provides a platform to implement data driven and Hybrid — keyword + data driven — framework by spreadsheet template. It can be used in your current automation project. SAF helps enterprises speed up testing using accelerators at the test design layer while keeping the automation suite flexible to interface with commercial tools, whenever needed. The test framework provides a comprehensive reporting dashboard for managing tests.
