Siegfried Howell, 2019-12-12. This book, *A Whole Year of Chemistry Quizzes*, was written to provide easy-to-use and grade quizzes to assess the comprehension of honors students, Advanced Placement students, AP, and International Baccalaureate (IB) students. This book of quizzes guides the teacher and the student through what is required in a non-watered-down chemistry course that leads students towards test and college readiness. The outline of this book has a minimum of 4 quizzes per chapter that prepares students for the formative assessment associated at the end of all chapters. The 25 chapters include topics that are covered in the honors chemistry setting as well as specialty topics like thermodynamics, kinetics, rates of reactions that are seen in the Advanced Placement classes. Included within this book are quizzes for the International Baccalaureate teacher that wishes to test students on environmental chemistry as well as biological and food chemistry. This is a book that was written to fill the void of valuable resources needed for novice and experienced teachers in institutions that continually push for more summative assessments, higher DOKs, and rapid feedback while limiting preparation time. As a teacher for over 25 years, I know that any well-outlined, structured, and comprehensive resource saves time in additional planning, searching, and preparing. Use this book to help you identify and test students on topics that are important to their comprehension and success with their final test.
