*Illiterate Inmates* Rosalind Crone,2022-05-12 The nineteenth century prison we have been told was a place of hard labour hard board and hard fare Yet it was also a place of education Schemes to teach prisoners to read and write and sometimes more besides can be traced to the early 1800s State funded elementary education for prisoners pre dated universal and compulsory education for children by fifty years In the 1860s when the famous maxim just cited became the basis of national penal policy arithmetic was included by legislators alongside reading and writing as a core skill to be taught in English prisons By c 1880 every prison in England used to accommodate those convicted of criminal offences had a formal education programme in which the 3Rs reading writing and arithmetic were taught to males and females adults and children alike Not every programme however had prisoners enrolled in it *Illiterate Inmates* tells the story of the emergence at the turn of the nineteenth century of a powerful idea the provision of education in prisons for those accused and convicted of crime and its execution over the century that followed Using evidence from both local and convict prisons the study shows how education became part of the modern penal regime While the curriculum largely reflected that of mainstream elementary schools the delivery of education shaped by the penal environment created an entirely different educational experience At the same time philosophies of imprisonment which prioritised punishment and deterrence over reformation undermined any socially reconstructive ambitions Thus the period between 1800 and 1899 witnessed the rise and fall of the prison school in England

Valentino,2013-01-19 Benjamin A Valentino finds that ethnic hatreds or discrimination undemocratic systems of government and dysfunctions in society play a much smaller role in mass killing and genocide than is commonly assumed He shows that the impetus for mass killing usually originates from a relatively small group of powerful leaders and is often carried out without the active support of broader society Mass killing in his view is a brutal political or military strategy designed to accomplish leaders most important objectives counter threats to their power and solve their most difficult problems In order to capture the full scope of mass killing during the twentieth century Valentino does not limit his analysis to violence directed against ethnic groups or to the attempt to destroy victim groups as such as do most previous studies of genocide Rather he defines mass killing broadly as the intentional killing of a massive number of noncombatants using the criteria of 50 000 or more deaths within five years as a quantitative standard Final Solutions focuses on three types of mass killing communist mass killings like the ones carried out in the Soviet Union China and Cambodia ethnic genocides as in Armenia Nazi Germany and Rwanda and counter guerrilla campaigns including the brutal civil war in Guatemala and the Soviet occupation of Afghanistan Valentino closes the book by arguing that attempts to prevent mass killing should focus on disarming and removing from power the leaders and small groups responsible for instigating and organizing the killing      **The United States Catalog** Eleanor E.
