Teton Sioux Music Frances Densmore,1918 On the Origin of Planets M. M. Woolfson,2011 The book begins with a historical review of four major theories for the origin of the Solar System in particular or of planets in general which highlight the major problems that need to be solved by any plausible theory In many theories including that which form the major theme of this book the formation of planets and stars is intimately linked so four chapters are devoted to the processes that can be described as the birth life and death of stars Recent observations that have revealed the existence of planets around many Sun like stars are described in detail followed by a clear exposition of the Capture Theory for the origin of planets Many aspects of this theory are illustrated with sophisticated computer modelling that convincingly demonstrates the plausibility of the theory The Capture Theory is in complete accord with all observations including the estimate it gives for the proportion of Sun like stars with planets It is the only theory that sits comfortably with all present observational and theoretical constraints The general theory of planet formation does not explain the detailed structure of the Solar System An early postulated collision of two major planets is shown to explain many disparate features of the Solar System the nature of the terrestrial planets surface features of the Moon and its relationship with Earth asteroids comets and dwarf planets the relationship between Neptune Triton and Pluto and the characteristics of meteorites including the isotopic anomalies found in them The postulate of a planetary collision is given support by a 2009 NASA observation of the residue of such an event around a distant young star **United States Civil Aircraft Register** ,1973 *Los Angeles Educational Research Bulletin* Board of Education of the City of Los Angeles,1922 **The Ostracoda of the Cretaceous of North Texas ...** Charles Ivan Alexander,1929 **Agricultural Economics Research** ,1970 Fishery Bulletin ,1983 *Industry Self-regulation* United States.
