Numeracy Tasks For Vcal:

Foundation Numeracy in Context David Tout, Gary Motteram, 2006 Foundation Numeracy in Context describes an approach to teaching mathematics based on applied and contextual learning principles. This means that the teaching and learning of mathematics proceeds from a contextual task based and investigative point of view where the mathematics involved is developed from a modelled situation or practical task. Practical investigations and projects are principle vehicles for student learning in such an approach. This text is written for teachers working with students who have become disengaged from learning mathematics during the middle to latter years of secondary schooling and will likely have had limited success with mathematics. The approach used will be helpful for teachers of students who need a practical rather than formal mathematical background for their everyday life skills and further education training or career aspirations. The text illustrates how this approach works through some sample contexts such as cars and driving, sport, cooking and catering and draws together mathematics from the areas of number, measurement, space, data and statistics and algebra. Lowe, Roselyn Dixon, Karen Trimmer, 2023-04-11 This book explores the current state of research on Indigenous education in Australia. In particular, these chapters focus on exploring deep and enduring questions about the failures of schooling to address the needs of Aboriginal communities. This book provides a systematic analysis of existing research to explain how connection to culture and the recognition of Indigenous sovereignties and knowledges are the keys to Aboriginal excellence in schooling.

Education in Out-of-Home Care Patricia McNamara, Carme Montserrat, Sarah Wise, 2019-11-08 This book draws together for the first time some of the most important international policy practice and research relating to education in out of home care. It addresses the knowledge gap around how good learning experiences can enrich and add enjoyment to the lives of children and young people as they grow and develop. Through its ecological development lens it focuses sharply on the experience of learning from early childhood to tertiary education. It offers empirical insights and best practices examples of learning and caregiving contexts with children and young people in formal learning settings at home and in the community. This book is highly relevant for education and training programs in pedagogy, psychology, social work, youth work, residential care, foster care and kinship care along with early childhood, primary, secondary and tertiary education courses.
