COMPSTAT Konstantin Momirovic,Vesna Mildner,2012-12-06 Although no one is probably too enthused about the idea it is a fact that the development of most empirical sciences to a great extent depends on the development of data analysis methods and techniques which due to the necessity of application of computers for that purpose actually means that it practically depends on the advancement and orientation of computer statistics Every other year the International Association for Statistical Computing sponsors the organization of meetings of individual s professional77y involved in computational statistics Since these meetings attract professionals from allover the world they are a good sample for the estimation of trends in this area which some believe is a statistics proper while others claim it is computer science It seems though that an increasing number of colleagues treat it as an independent scientific or at least technical discipline This volume contains six invited papers 41 contributed papers and finally two papers which are formally software descriptions but it was agreed by the Program Committee that they should be included in a separate section entitled Notes about new developments in statistical software due to their special significance for current trends in computational statistics
