MISTRA MISTRA

Nursing 2015 Baragwanath Hospital:

African nurses and everyday work in twentieth-century Zimbabwe Clement Masakure, 2020-12-15 Informed by the memories of African nurses this book highlights the experiences of men and women who provided nursing services in Zimbabwe's hospitals in the twentieth century. It argues that in their subordinate positions and within their various capacities nursing assistants, nursing orderlies, medics, and qualified nurses, African women and men played a pivotal role in the provision of healthcare services to their fellow Africans. They transformed hospital spaces into their own, reshaped and reformulated indigenous as well as western nursing and biomedical practices. Through their work, African nurses contributed to the development of the nation by being at the bedside, healing the sick and nursing the infirm. **Epidemics and the Health of African Nations** MISTRA, 2019-07-25 News footage of disease in Africa is a familiar sight. Yet these outbreaks are often presented out of context with no reference to the conditions that have triggered them. MISTRA's new book **Epidemics and the Health of African Nations** aims to redress that. Researchers and practitioners from within the continent explore why Africa is so vulnerable to disease and show how this vulnerability is closely linked to political and economic factors. They demonstrate how these same factors determine the way epidemics are treated. Authors extract lessons from case studies in different parts of Africa, challenge conventional frameworks about disease, to argue for a syndemics approach that takes into account the interrelationship between disease and political and socio-economic contexts, explore challenges of Africa's future. They argue that a well-functioning health system is at the core of a country's capacity to counter an epidemic. This volume brings African experts together to probe possible solutions to the continent's heavy burden of disease. The insights offered will be helpful in devising policy for the control of disease and the combatting of epidemics in Africa. **Contingent Citizens** Elizabeth Hull, 2020-05-27 **Contingent Citizens** examines the ambiguous state of South Africa's public sector workers and the implications for contemporary understandings of citizenship. It takes us inside an ethnography of the professional ethic of nurses in a rural hospital in KwaZulu Natal, shaped by a deep history of mission medicine and changing forms of new public management. Liberal democratic principles of transparency, decentralization, and rights, though promising freedom from control, often generate fear and insecurity instead. But despite the pressures they face, Elizabeth Hull shows that nurses draw on a range of practices from international migration to new religious movements to assert new forms of citizenship. Focusing an anthropological lens on professionalism, Hull explores the major fault lines of South Africa's fragmented social landscape: class, gender, race, and religion, to make an important contribution to the study of class formation and citizenship. This prize-winning monograph will be of interest to scholars of anthropology, development studies, sociology, and global public health. **Johannesburg**, 1974 **Proceedings of the 2nd Biennial South African Conference on Spirituality and Healthcare** Annemarie Oberholzer, André de la Porte, 2018-06-11 Illness causes an existential crisis for people as it confronts them with the fragility, vulnerability, and finitude of the human condition. Serious
