Dementia Bill Halsall, Michael Riley, Eef Hogervorst, 2023-12-11 Design for Dementia is written by an interdisciplinary team of professionals and academics whose aim is to present lessons learnt from the Dementia Demonstration House at the Building Research Establishment's Innovation Park Known as Chris and Sally's House the project represents a unique opportunity to show in practice what can be done to assist people living with dementia to continue to live at home and as part

of the community with as much independence as possible This book presents evidence based practical design guidance backed up by over 15 combined years of research by experienced professional designers Beginning with an introduction which provides the background to the global dementia epidemic to allow readers to gain a better understanding of the issues they must consider the book then discusses how good design principles planning and construction standards can be used to effectively respond to the dementia crisis The detailed findings from research using Chris and Sally s House are presented and discussed along with practical examples and success stories ranging from simple design features to the more complex use of sensors and automated ventilation The hope is that readers can apply the lessons learnt from Chris and Sally s House to successfully integrate solutions into the design of new or refurbished housing for the elderly and also that the tools and insights shared will inform the wider context of good housing design as well as the spectrum of constraints and design standards which often apply This book is important reading for architects designers engineers and project managers but also anyone with an interest in learning about practical solutions to aid those with dementia to live well at home Maternity, Newborn, and Women's Health Nursing Susan A. Orshan,2008 This new book will be a core text for undergraduate Maternity Newborn courses It also will work for courses emphasizing Women s Health across the lifespan Coverage includes core content on preconception pregnancy labor birth and postpartum In addition the text focuses on important topics throughout a woman s life health promotion nutrition medical issues psychosocial issues sexuality family fertility control and issues menopause and aging While other texts touch on the different stages of a woman s lifespan this book provides more detail and information in areas outside the average maternity text **Design Justice** Sasha Costanza-Chock,2020-03-03 An exploration of how design might be led by marginalized communities dismantle structural inequality and advance collective liberation and ecological survival What is the relationship between design power and social justice Design justice is an approach to design that is led by marginalized communities and that aims explicitly to challenge rather than reproduce structural inequalities It has emerged from a growing community of designers in various fields who work closely with social movements and community based organizations around the world This book explores the theory and practice of design justice demonstrates how universalist design principles and practices erase certain groups of people specifically those who are intersectionally disadvantaged or multiply burdened under the matrix of domination white supremacist heteropatriarchy ableism capitalism and settler colonialism and invites readers to build a better world a world where many worlds fit linked worlds of collective liberation and ecological sustainability Along the way the book documents a multitude of real world community led design practices each grounded in a particular social movement Design Justice goes beyond recent calls for design for good user centered design and employment diversity in the technology and design professions it connects design to larger struggles for collective liberation and ecological survival Community/Public Health Nursing - E-Book Mary A. Designing for Therapeutic Environments David Canter,Sandra Canter,2025-09-01 Originally published in 1979 *Therapeutic Environments* brings together a set of previously unpublished accounts of studies by internationally recognized experts in North America and Britain of the full range of places which are designed to facilitate the processes of healing caring and helping The papers have been collected and edited by David Canter an Environmental Psychologist who has published a number of books on people and buildings and Sandra Canter a Clinical Psychologist who has published previously on the determinants of personality and the effect of vitamins During the previous two decades there had been a growing outcry in both Europe and North America against the environments in which society housed those undergoing treatment or requiring care and attention Clearly institutions should not make their inmates worse and the consensus of opinion at the time was that if they were not actually making people worse the caring buildings certainly were not helping to make them better In response to this awakened desire to produce physical environments which contributed positively to the therapeutic process this book drew together specially commissioned papers written by those who had been actively involved in studying or creating therapeutic environments both in Britain and America Forming a unique overview of the present state of thought and action in this

increasingly important area of design Therapeutic Environments was an important work of reference not only for clinical community and environmental psychologists but for all social work groups and aware architects with an active interest in the planning and operation of environments with a specialist caring responsibility This book is a re issue originally published in 1979 The language used is a reflection of its era and no offence is meant by the Publishers to any reader by this re
