The Nature of Scholarship, a Career Legacy Map and Advanced Practice Laserina

O'Connor, 2019-05-22 This book endorsed by the International Council of Nurses explores a new conversation around scholarly talents for advanced candidate nurse practitioners that comprise a variety of forms such as teaching synthesis discovery engagement and application It offers an expansive view of Boyer's scholarship with a call to action for advanced

candidate nurse practitioners to thoughtfully plan and map their personal goals and capabilities that will mark them as professionals and future scholars needed in today's challenging and changing professional workplace. Knowing how to apply the various forms of scholarship to problems of practice within one's field of expertise and the implications of Boyer's pillars of scholarship for advanced candidate nurse practitioners are interweaved throughout this book. The volume discusses the science of career cartography alongside legacy planning and career mapping. The toolkit illustrates a guide for advanced candidate nurse practitioners to create their individual career legacy map and reflect on how they wish to contribute to the discipline of nursing while working to improve the lives of others. This book serves as a catalyst for robust conversations among scholar practitioners on the very nature of clinical scholarship.

The Oxford Handbook of Meaningful Work Ruth Yeoman, Catherine Bailey, Adrian Madden, Marc Thompson, 2019-01-03. The Oxford Handbook of Meaningful Work examines the concept, practices and effects of meaningful work in organizations and beyond. Taking an interdisciplinary approach, this volume reflects diverse scholarly contributions to understanding meaningful work from philosophy, political theory, psychology, sociology, organizational studies and economics. In philosophy and political theory, treatments of meaningful work have been influenced by debates concerning the tensions between work as unavoidable and necessary and work as a source of self-realization and human flourishing. This tension has come into renewed focus as work is reshaped by technology, globalization and new forms of organization. In management studies, much empirical work has focused on meaningful work from the perspective of positive psychology, but more recent research has considered meaningful work as a complex phenomenon socially constructed from interactive processes between individuals and between individuals, organizations and society. This Handbook examines meaningful work in the context of moral and pragmatic concerns such as human flourishing, dignity, alienation, freedom and organizational ethics. The collection illuminates the relationship of meaningful work to organizational constructs of identity, belonging, callings, self-transcendence, culture and occupations. Representing some of the most up-to-date academic research, the editors aim to inspire and equip researchers by identifying new directions and methods with which to deepen scholarly inquiry into a topic of growing importance.

Health Promotion Marilyn Frenn, Diane K. Whitehead, 2021-01-05. Take an evidence-based approach to health promotion across the lifespan and clinical specialties. Written for NPs and advanced practitioners, this text provides coaching in how to read, evaluate and apply the best evidence to health promotion plans for individuals and their families to help them prevent or manage chronic and acute diseases and disorders. Step by step, a who's who of educators, researchers and practitioners explore the models and skills you need to help your patients, including those with multiple co-morbidities, while evaluating medical evidence that changes rapidly or may be unclear. You'll also be prepared for the health promotion questions on certification exams.

Nursing Informatics 2016 W. Sermeus, P.M. Procter, P. Weber, 2016-07-21. As the importance of electronic and digital devices in the provision of healthcare increases, so does the need for interdisciplinary collaboration to make the most of the new technical

possibilities which have become available This book presents the proceedings of the 13th International Conference on Nursing Informatics held in Geneva Switzerland in June 2016 This biennial international conference provides one of the most important opportunities for healthcare professionals from around the world to gather and exchange expertise in the research and practice of both basic and applied nursing informatics The theme of this 13th conference is eHealth for All Every Level Collaboration From Project to Realization The book includes all full papers as well as workshops panels and poster summaries from the conference Subjects covered include a wide range of topics from robotic assistance in managing medication to intelligent wardrobes and from low cost wearables for fatigue and back stress management to big data analytics for optimizing work processes and the book will be of interest to all those working in the design and provision of healthcare today
