

Nursing Ethics

Ethics are essential requirements in the process of carrying out the duties in any profession. The application of ethics helps one to relate well with others as well as discharge their duties in the best interest of the clients and the institutions for which they work (Vanlaere, & Gastmans, 2007). In this scenario, my response to Mr. Newcomb would be that I will adhere to his request and allow him to meet his mistress the following day. Denying him the request will not be good for him in the last days of his life.

The nursing professional is accompanied by various ethical principles that one must adhere in professional practice. The principles include that of beneficence, which requires a nurse to ensure that the actions taken promote the best interest of the patient. As such, a nurse must select actions that will be of utmost good for the patient. Another principle that guides nurses is that of non-maleficence, which requires them not to do any harm to the patients (Vanlaere, & Gastmans, 2007). Additionally, there is also the principle of autonomy, which states that no one should compel nurses and other professionals while making their decision. Lastly, the principle of justice requires that all medical officials ensure that the patients enjoy their rights.

While making the decision to respond to the patient, I followed what I believe in. For instance, I think that Mr. Newcomb has the right to see the person that he wishes at this time that he nears the death. Mr. Newcomb deserves the chance to meet the person that he wants and thus it was right for me to give him that respect.

There are different strategies that one may use in the essence of promoting self-care. One of the best means is to get enough sleep.

Ethical Health Care Patricia Illingworth,2017-10-03 Offering a format that is significantly different than that offered by other books Ethical Health Care beings by asking what is meant by health and how it is achieved The book then proceeds to explore with care and context the nature of the relationship between patients and clinicians health care providers and the societies in which they inhabit and finally the relationship between the health care enterprise and the international community By emphasizing the ethical issues that arise in the broad quest to foster human health and appreciating that health is not primarily a function of medical interventions Ethical Health Care introduces students to problems such as the international distribution of pharmaceuticals and the dangers of reemerging infections To a far greater extent than is done traditionally Ethical Health Care provides an interdisciplinary perspective to bioethics relying heavily upon the teachings of economics law and public health **A Knapsack Full of Dreams** Cathy Crowe,2019-06-27 My nurse hands once did more useful things They immunized the fat healthy thighs of infants they carefully measured cardiac drugs to administer to young heart patients they bathed both the elderly lady after her surgery and the 24 year old Italian Canadian woman after her death My hands once mixed linseed poultices rubbed twenty backs a night before darkness fell and by flashlight checked intravenous drips catheters and other tubing They made hot milk in the middle of the night and then later at home soothed a child with too frequent earaches These are good uses for hands Now they carry a black bag into streets alleyways and ravines The bandages I carry no longer cover the wounds of my patients My vitamins will not prevent the white plague of tuberculosis from taking another victim The granola bars I carry cannot begin to feed the hunger I meet I cannot even help someone achieve one peaceful night of safety and sleep Only roofs will do that And I am not a carpenter There is no right to shelter or housing in Canada Over the past three decades a series of federal governments cut funding for social programs

and eliminated our national housing program leaving hundreds of thousands of people victim to the tsunami of homelessness that was declared a national disaster twenty years ago No one knows this reality better than Cathy Crowe who witnessed the explosion of homelessness across Canada while working as a Street Nurse This fallout was accompanied by great suffering inhumane shelter conditions new disease outbreaks and clusters of homeless deaths It is a reality that spans across the entire country In A Knapsack Full of Dreams Cathy Crowe details her lifelong commitment as a nurse and social justice activist particularly her thirty years as a Street Nurse with passion grace and fortitude Presented through the lens of someone dedicated to the power and beauty of film A Knapsack Full of Dreams will move you then inspire you to act **Innovations**

in Cancer and Palliative Care Education Lorna Foyle, Janis Hostad, 2017-10-03 This work includes Foreword by Nigel Sykes Medical Director St Christopher's Hospice London This practical evidence based guide has been specifically designed for teachers in cancer and palliative care It is completely up to date and covers the recent complex changes in cancer and palliative care delivery offering a range of different creative approaches Ideal for training the text includes highlighted key points self help questions for reflection and references where applicable It provides invaluable guidance for all healthcare professionals with palliative care teaching responsibilities including undergraduate and postgraduate healthcare educators and Macmillan lecturers This book gives us a three dimensional view of how to respond to the demands on cancer and palliative care education today set particularly in a British context but of course capable of extrapolation to other settings These three dimensions of innovation can be summarised as What do you teach How do you teach it To whom do you teach it Innovation in all three aspects simultaneously may be difficult to achieve but all who have a responsibility for education are faced with the challenges of making their teaching more effective and demonstrating that they have done so keeping abreast of advancing knowledge and clinical practice and of reaching out to groups of learners who hitherto have been neglected Of significant help to anyone in this field whose concern is the delivery of effective and appropriate education Nigel Sykes in the Foreword
