

## Formula Adjustment (Nutramigen® or Nutramigen® with Enflora-LGG®)

### Why do I need to adjust the calories in my baby's formula?

Nutramigen® or Nutramigen® with Enflora® LGG® are made for babies who have allergies or need a formula that is easy for them to digest. Nutramigen® powder with Enflora® LGG® contains a probiotic to keep the stomach and intestines healthy and working normally.

These formulas are usually prepared to 20 calories per ounce, but some babies may need a different caloric level to gain the right amount of weight.

### How do I mix the formula?

1. Wash your hands and work surfaces with soap and water. Wash the top of the formula can before opening to prevent germs from getting into the baby's feeding. Use clean measuring utensils and containers.
2. Let the cold tap water run for 1-2 minutes before mixing with the formula to flush the water sitting in the pipes. Well water may contain bacteria and should not be used to make infant formula.
3. Follow the instructions in the next column for either liquid concentrate or powdered formula.

### Using Nutramigen® liquid concentrate

1. Check the formula label. It should read "concentrate," **not** "ready-to-use." Shake the can before opening.
2. Check the recipe chart for liquid concentrate on page 3. Pour the formula concentrate from the can into another container.
3. Measure the desired amount of water in a clear, liquid measuring cup. Set the container on a level surface, and check the level of the liquid at eye level. Add the water to the concentrate and mix well.

### Using Nutramigen® with Enflora® LGG® powder

1. Check the recipe chart for powdered formula on page 4. Using a clear, liquid measuring cup, measure the desired amount of water. Set the measuring cup on a flat surface, and check the level of the liquid at eye level.
2. Use only cool water to make the formula. Using warm or hot water can limit the benefits from the probiotics.
3. Use only the scoop provided in the formula can or measuring utensils intended for dry ingredients. Pack and level the formula powder. Add the powder on top of the water.
4. Mix or shake well until all lumps are gone.
