Office of Experiment Stations, 1939. *Current Strategies to Improve the Nutritional and Physical Quality of Baked Goods* Mario Martinez Martinez, Manuel Gómez Pallarés, 2020-03-18.

The lifestyle of humans is rapidly changing and correspondingly their needs and the current and future megatrends of the food market. It is worth mentioning: 1 the preference for natural, simple and flexible diets that drive the further expansion of plant-focused formulations; 2 the focus on food sustainability, food waste reduction; and 3 the interest in healthy eating as the basis for good health. The hectic routine and rapid urbanization in developed and developing regions respectively have shifted consumer preferences toward bread and baked foods which interestingly are often high in sugars and are categorized as having a high glycemic index. Therefore, it is of major importance to address the technological challenges of manufacturing baked goods with high physical and sensory quality that result in positive metabolic responses. This Special Issue seeks to provide fundamental understanding in this area and novel strategies to improve the nutritional properties of baked goods including a decrease in starch bioaccessibility, sugar reduction, increase in fiber and/or protein content, and the improvement of phytochemical bioactivity.

This Special Issue will also cover studies on the physical and sensory improvements of baked goods that may provide a mechanistic understanding to minimize the loss of quality after the incorporation of nutritional improving ingredients such as edible byproducts proteins or fibers Last but not least studies focused on the reduction of additives clean label or fat and on the use of sourdough to improve the sensory properties of baked goods will also be included [Advances in Food and Nutrition Research](#) Steve Taylor,2009-11-06 [Advances in Food and Nutrition Research](#) recognizes the integral relationship between the food and nutritional sciences and brings together outstanding and comprehensive reviews that highlight this relationship Contributions detail scientific developments in the broad areas of food science and nutrition and are intended to provide those in academia and industry with the latest information on emerging research in these constantly evolving sciences The latest important information for food scientists and nutritionists Peer reviewed articles by a panel of respected scientists The go to series since 1948 **Advances in Food and Nutrition Research** Fidel Toldra,2019-01-24 [Advances in Food and Nutrition Research](#) Volume 87 provides updated information on nutrients in foods and how to avoid deficiency especially the essential nutrients that should be present in the diet to reduce disease risk and optimize health The book provides the latest advances on the identification and characterization of emerging bioactive compounds with putative health benefits Chapters in this new release include discussions of the function and application of bioactive peptides from corn gluten meal Dietary fatty acids and metabolic syndrome the Microbial ecology of plant based fermented foods and current knowledge on their impact on human health and much more **3D Printing of Sustainable Insect Materials** Divya Singh,Ranvijay Kumar,Sunpreet Singh,Seema Ramniwas,2023-06-08 This book compiles a diverse and interdisciplinary range of scientific literature laboratory developments industrial implications and future prospects covering Entomophagy in 3D food printing to fight against hunger and nutritional deficiencies Recent developments in Entomophagy in 3D printing of Drosophila based materials and their nutritional social economic scientific and environmental aspects are comprehensively covered Readers will also find shortcomings guidelines and industrial prospects for these materials with emphasis on processing methods for the extraction of sustainable materials through 3D food printing 3D Printing of Sustainable Insect Materials focuses on the methodology technology and processing used for utilizing insects in 3D food printing applications establishing technology driven knowledge to fight against hunger Chapters cover the principles for Entomophagy insect processing methods modern 3D food printing technologies and the theoretical and practical aspects of Entomophagy in 3D printing with a special focus on future prospects and technologies This ground breaking book will serve knowledge to researchers and industry professionals across the food industry with broad coverage of emerging technologies materials developed through Entomophagy functional characterization and the technical details required to produce sustainable insect based materials through 3D food printing [Specialty Oils and Fats in Food and Nutrition](#) Geoff Talbot,2015-06-29 [Specialty Oils and Fats in Food and Nutrition](#) Properties Processing and Applications examines the main specialty oils and fats
