Osteopathy and Nutrition for Managing the Irritable Bowel Syndrome Rita Lombardini, Luca

Collebrusco, 2016-03-31 Gastrointestinal tract dysfunction such as Irritable Bowel Syndrome IBS is one of the most common intestinal complaints that prompts an individual to consult a doctor. However, ambiguities in defining it and slow accumulation of evidence on the benefits of treatment have made this syndrome notoriously difficult to diagnose and treat. Our goal has been to prepare a text that provides an overview of IBS and the main concepts and practice of osteopathy and nutrition. The result is a book which presents IBS management using OMT, dietary modifications and nutritional supplements according to current evidence-based literature. We have also added some appendices on practical applications which might then serve as a simple treatment plan for a broad range of healthcare professionals including osteopaths, physiotherapists, manual therapists, sports science graduates, massage and bodywork therapists and nutritionists to reduce the chronic pain and inflammation that are associated with IBS.
