Model-Reference Robust Tuning of PID Controllers Victor M. Alfaro, Ramon Vilanova, 2016-04-16 This book presents a unified methodology for the design of PID controllers that encompasses the wide range of different dynamics to be found in industrial processes This is extended to provide a coherent way of dealing with the tuning of PID controllers The particular method at the core of the book is the so called model reference robust tuning MoReRT developed by the authors MoReRT constitutes a novel and powerful way of thinking of a robust design and taking into account the usual design trade offs encountered in any control design problem The book starts by presenting the different two degree of freedom PID control algorithm variations and their conversion relations as well as the indexes used for performance robustness and fragility evaluation the bases of the proposed model Secondly the MoReRT design methodology and normalized controlled process models and controllers used in the design are described in order to facilitate the formulation of the different design problems and subsequent derivation of tuning rules In later chapters the application of MoReRT to over damped inverse response integrating and unstable processes is described The book ends by presenting three possible extensions of the MoReRT methodology thereby opening the door to new research developments In this way the book serves as a reference and source book for academic researchers who may also consider it as a stimulus for new ideas as well as for industrial practitioners and manufacturers of control systems who will find appropriate advanced solutions to many application problems *Manuals Combined: U.S. Navy FIRE CONTROLMAN Volumes 01 - 06 & FIREMAN*, Over 1 600 total pages 14097 FIRE CONTROLMAN SUPERVISOR Covers Fire Controlman supervisor responsibilities organization administration inspections and maintenance supervision and training combat systems subsystems and their maintenance and weapons exercises 14098 FIRE CONTROLMAN VOLUME 01 ADMINISTRATION AND SAFETY Covers general administration technical administration electronics safety and hazardous materials as they pertain to the FC rating 14099A FIRE CONTROLMAN VOLUME 02 FIRE CONTROL SYSTEMS AND RADAR FUNDAMENTALS Covers basic radar systems fire control systems and radar safety as they relate to the Fire Controlman rating 14100 FIRE CONTROLMAN VOLUME 03 DIGITAL DATA SYSTEMS Covers computer and peripheral fundamentals and operations configurations and hardware operator controls and controlling units components and circuits central processing units and buses memories input output and interfacing instructions and man machine interfaces magnetic tape storage magnetic disk storage CD ROM storage printers data conversion devices and switchboards 14101 FIRE CONTROLMAN VOLUME 04 FIRE CONTROL MAINTENANCE CONCEPTS Introduces the Planned Maintenance System and discusses methods for identifying and isolating system faults liquid cooling systems used by Fire Controlmen battery alignment purpose equipment and alignment considerations and radar collimation 14102 FIRE CONTROLMAN VOLUME 05 DISPLAY SYSTEMS AND DEVICES Covers basic display devices and input devices associated with Navy tactical data systems as used by the FC rating 14103 FIRE CONTROLMAN VOLUME 06 DIGITAL
