Catholics in America Lisa A. Keister, 2024-10-15 More than 20 percent of Americans are Catholic and overall membership in the Catholic Church has remained relatively steady even as increasing numbers of people claim no religious affiliation The rising prominence of Catholics in important leadership positions and critical demographic changes to the US population that have been mirrored in the Church have brought the Catholic Church and its members into public conversations bringing renewed attention to the country's single largest religious organization Yet misperceptions about who Catholics are today their religious beliefs and practices and their attitudes regarding important political and social issues are pervasive Catholics in America provides a contemporary social portrait of this large increasingly influential group that clarifies who Catholics are and what they really believe Lisa Keister a sociologist with decades of experience studying Americans social and economic behaviors and attitudes draws on extensive empirical evidence to uncover the real story of today's Catholics She offers a fresh new glimpse into the reality of the family behaviors work and economic status and beliefs of Catholics She pays particular attention to differences between those who have left joined and stayed with the Church and she documents important sometimes dramatic differences among Catholics that may define the Church in coming decades The presence of Catholics in the country's highest positions and their voice in critical national conversations about issues such as abortion testify to the significance of their beliefs and attitudes Catholics in America will be an important guide for anyone wanting to understand the personal and religious foundations of today's Catholics

schools across the country Status norms provide a starting point for educators to review data and help them gain an understanding of each child s current academic level where they need focused instruction and the extent of their progress The 2011 NWEA RIT Scale Norms Study provides growth and status norms for all five RIT scales Reading Language Usage Mathematics General Science and Science Concepts and Processes [NWEA FAQ](#) Northwest Evaluation Association,2015 Northwest Evaluation Association NWEA conducts norming studies every several years to provide the best and most up to date information we can about student achievement and growth to better support educational decision making It is an important part of our commitment to our partners The most recent NWEA norms were released in July 2015 Just as we expect student performance to change with time norms of student performance will change correspondingly For 2015 several factors may have influenced how the US school age population performed on Measures of Academic Progress MAP assessments of language usage mathematics and reading over the 2011 12 2012 13 and 2013 14 school years Prominent among these possible factors are the introduction of Common Core instruction and Common Core versions of MAP But as with all empirical studies changes in scope and data necessitated changes in statistical design and analyses The methodological improvements introduced in the 2015 norms have resulted in a set of norms that are more representative of the US school age population than previous NWEA norms Methodological changes involved differences in the way post stratification weights were developed and the way growth was modeled Details of these changes are addressed more thoroughly in the 2015 Norms Study As a result of the improved methodology partners can expect some differences from previous norms as explained below
