NWEA.** Northwest Evaluation Association, 2016 This guide was created as a resource to help families better understand Measures of Academic Progress MAP and their child s results The guide provides answers to a variety of questions such as What is MAP What does MAP measure How do schools and teachers use MAP scores Can MAP tell me if my child is working at grade level and more The guide also includes a Quick Reference sample report to help parents understand the Student Progress Report The Student Progress Report will contain the child s NWEA MAP test results and provide information to show how the child is doing compared to other students in the same grade in the child s school district and across the United States **Preparation for the NWEA MAP Test**, 2024 This book contains 300 questions to prepare your student for the NWEA MAP testing assessment This book is not affiliated with nor endorsed by

NWEA front cover      **NWEA FAQ** Northwest Evaluation Association, 2015 Northwest Evaluation Association NWEA conducts norming studies every several years to provide the best and most up to date information we can about student achievement and growth to better support educational decision making It is an important part of our commitment to our partners The most recent NWEA norms were released in July 2015 Just as we expect student performance to change with time norms of student performance will change correspondingly For 2015 several factors may have influenced how the US school age population performed on Measures of Academic Progress MAP assessments of language usage mathematics and reading over the 2011 12 2012 13 and 2013 14 school years Prominent among these possible factors are the introduction of Common Core instruction and Common Core versions of MAP But as with all empirical studies changes in scope and data necessitated changes in statistical design and analyses The methodological improvements introduced in the 2015 norms have resulted in a set of norms that are more representative of the US school age population than previous NWEA norms Methodological changes involved differences in the way post stratification weights were developed and the way growth was modeled Details of these changes are addressed more thoroughly in the 2015 Norms Study As a result of the improved methodology partners can expect some differences from previous norms as explained below      Smarter Balanced Preliminary Performance Levels Northwest Evaluation Association, 2015 Recently the Smarter Balanced Assessment Consortium Smarter Balanced released a document that established initial performance levels and the associated threshold scale scores for the Smarter Balanced assessment The report included estimated percentages of students expected to perform at each of the four performance levels reported by grade and test subject e g English Language Arts or Mathematics based on preliminary field testing of the Smarter Balanced assessment conducted during the spring of 2014 These threshold scale scores and expected percentages represent a preliminary attempt at standard setting and Smarter Balanced may revise them after the spring 2015 testing term Nevertheless they represent the best information currently available about the cut scores that will be used during the spring 2015 testing term of the Smarter Balanced test Using the information provided within the Smarter Balanced report about the percentages of students expected to perform at each level Northwest Evaluation Association NWEA conducted a series of analyses to examine what Measures of Academic Progress MAP interim assessment scores might be associated with these performance level categories This was not an empirical study in the manner of our normal scale linking studies because the Smarter Balanced assessment has not yet been fully implemented NWEA intends to work with its partner school districts to conduct such a study examining the relationship between MAP performance and Smarter Balanced performance for individual students once Smarter Balanced has been fully implemented within NWEA partner districts NWEA analyses focused on the percentages of students expected to perform within each of the Smarter Balanced performance levels NWEA compared these percentages to our own nationally representative normative distributions in order to estimate the MAP scores that would produce similar percentages of students as those expected to

fall within the Smarter Balanced performance level categories The approach taken here is quite similar to the approach used in many prior linking studies and can provide highly accurate estimates of cut scores Links used in this document are contained in the appendix
