**Obesity Prevention** Laurette Dube, 2010-06-25 Over the years approaches to obesity prevention and treatment have gone from focusing on genetic and other biological factors to exploring a diversity of diets and individual behavior modification interventions anchored primarily in the power of the mind to the recent shift focusing on societal interventions to design temptation proof physical social and economic environments In spite of repeated calls to action including those of the World Health Organization WHO the pandemic continues to progress WHO recently projected that if the current lifestyle trend in young and adult populations around the world persist by 2012 in countries like the USA health care costs may amount to as much as 17.7% of the GDP Most importantly in large part due to the problems of obesity those children may be the first

generation ever to have a shorter life expectancy than that of their parents Obesity Prevention presents the most current research and proposals for addressing the pandemic Past studies have focused primarily on either genetic or behavioral causes for obesity however today s research indicates that a strongly integrated program is the best prospect for success in overcoming obesity Furthermore focus on the role of society in establishing an affordable accessible and sustainable program for implementing these lifestyle changes is vital particularly for those in economically challenged situations who are ultimately at the highest risk for obesity Using studies from both neuroscience and behavioral science to present a comprehensive overview of the challenges and possible solutions The brain to society approach to obesity prevention focuses on what is needed in order to sustain a healthy pleasurable and affordable lifestyle Explores the brain to society approach to obesity prevention focusing on an integrative approach to addressing the obesity pandemic Presents both the nueroscientific and the behavioral factors that impact eating habits Identifies the challenges and suggests solutions for altering attitudes toward food on both an individual and a societal level *School Nutrition and Activity* Areej Hassan,2015-03-20 This title includes a number of Open Access chapters Childhood obesity is a major public health crisis nationally and internationally This insightful compendium provides valuable information and assesses the research foundations behind several school initiatives to help combat the epidemic of obesity in children and adolescents particularly using **Hormones and Nutrition in Obesity and Cachexia** Manfred J. Müller, Elliot, jr. Danforth, Alfred G. Burger, Uwe Siedentopp, 2012-12-06 International experts are brought together in this book to give basic as well as clinical data on obesity and cachexia and an integrated picture of the regulation of intermediary metabolism in both situations The data provide evidence that tissue catabolism and anabolism are regulated by similar mechanisms which again are the target of different hormonal and metabolic factors This joint discussion of the similarities evident in both areas will greatly benefit future understanding and research in obesity and cachexia **Front-of-Package Nutrition Rating Systems and Symbols** Institute of Medicine, Food and Nutrition Board, Committee on Examination of Front-of-Package Nutrition Rating Systems and Symbols (Phase II), 2012-01-30 During the past decade tremendous growth has occurred in the use of nutrition symbols and rating systems designed to summarize key nutritional aspects and characteristics of food products These symbols and the systems that underlie them have become known as front of package FOP nutrition rating systems and symbols even though the symbols themselves can be found anywhere on the front of a food package or on a retail shelf tag Though not regulated and inconsistent in format content and criteria FOP systems and symbols have the potential to provide useful guidance to consumers as well as maximize effectiveness As a result Congress directed the Centers for Disease Control and Prevention CDC to undertake a study with the Institute of Medicine IOM to examine and provide recommendations regarding FOP nutrition rating systems and symbols The study was completed in two phases Phase I focused primarily on the nutrition criteria underlying FOP systems Phase II builds on the results of Phase I while focusing on aspects related to consumer

understanding and behavior related to the development of a standardized FOP system Front of Package Nutrition Rating Systems and Symbols focuses on Phase II of the study The report addresses the potential benefits of a single standardized front label food guidance system regulated by the Food and Drug Administration assesses which icons are most effective with consumer audiences and considers the systems icons that best promote health and how to maximize their use

**Progress in Preventing Childhood Obesity** National Academies, Institute of Medicine, Food and Nutrition Board, Committee on Progress in Preventing Childhood Obesity, In collaboration with the Healthcare Georgia Foundation, 2006-03-28 The nation faces a growing epidemic of childhood obesity that threatens the immediate health of our children and their prospects of growing up healthy into adulthood During the past 30 years obesity in the United States has more than doubled among young children aged 2-5 years and adolescents aged 12-19 years and it has more than tripled among youth aged 6-11 years Currently more than 9 million children 6 years of age and older are considered to be obese The sequelae of obesity among children and youth are also rapidly increasing including an increased risk of type 2 diabetes hypertension metabolic syndrome asthma and social and psychological consequences including low self esteem and depression To develop a prevention focused action plan to reduce the number of obese children and youth in the United States the Institute of Medicine organized three regional symposia and held its second regional symposium in Atlanta Georgia on October 6-7 2005 Progress in Preventing Childhood Obesity Focus on Communities highlights the recurring themes that emerged from the symposium for accelerating change and moving forward with obesity prevention efforts empower communities and neighborhoods change the environment forge strategic partnerships garner and mobilize political support educate stakeholders identify leaders and build on cultural assets collect and disseminate local data evaluate programs and interventions and translate successful interventions to other communities Approximately 90 individuals active in childhood obesity prevention efforts in the southeastern region of the United States who represented a range of stakeholder perspectives and innovative practices in local communities including students community leaders physicians health educators clergy teachers and state and federal government officials were invited to participate in the symposium The contents of this summary reflect specific examples presented and discussed during the symposium and unless otherwise noted the general perspectives of the participants This summary along with two other symposia summaries and a more detailed discussion of insights and regional examples will be incorporated in the IOM committee's final report on progress in preventing childhood obesity that will be released in the fall of 2006
