John Rowan,Michael Jacobs,2002-10-16 Most therapists regardless of theoretical approach intuitively recognize that their sense of self intimately influences their work Using this elemental truth as a launching pad Rowan and Jacobs articulate the different avenues through which the self informs therapy and how each can be used to improve therapeutic effectiveness Along the way the authors provide a masterful exposition of transference countertransference and projective identification throwing much needed light on topics that have long been mired in controversy and confusion The book is a priceless resource for experienced therapists and those just beginning the journey Professor Sheldon Cashadan author of Object

Relations Therapy and The Witch Must Die The Hidden Meaning of Fairy Tales Outstandingly in the current literature this book meets the conditions for integrative psychotherapy to fulfil its undoubted potential as the therapy pathway of the future Much has to change in our field First people have to become better informed and more respectful of other traditions than their own engaging with all kinds of taboo topics Next vigorous but contained dispute has to take place without having a bland synthesis as its goal Finally the current situation in which integration runs in one direction only humanistic and transpersonal therapists learning from psychoanalysis has to be altered Rowan and Jacobs each a master in his own field have done a wonderful collaborative job The book s focus on what different ways of being a therapist really mean in practice guarantees its relevance for therapists of all schools or none and at every level Andrew Samuels Professor of Analytical Psychology University of Essex and Visiting Professor of Psychoanalytic Studies Goldsmith s College University of London There is no question in psychotherapy more important than the degree to which the practitioner should be natural and spontaneous Would it be sensible to leave one s ordinary everyday personality behind when entering the consulting room and adopt a stance based on learned techniques This is the question addressed by Rowan Jacobs in The Therapist s Use of Self approaching it from various angles and discussing the relevant ideas of different schools of thought The authors are very well informed and write with admirable clarity directness and wisdom and have made an impressive contribution to a problem to which there is no easy solution Dr Peter Lomas author of Doing Good Psychotherapy Out of Its Depth This book deals with what is perhaps the central question in therapy who is the therapist And how does that actually come across and manifest itself in the therapeutic relationship A good deal of the thinking about this in psychoanalysis has come under the heading of countertransference Much of the thinking in the humanistic approaches has come under such headings as empathy genuineness nonpossessive warmth presence personhood These two streams of thinking about the therapist s own self provide much material for the bulk of the book but other aspects of the therapist also enter the picture including the way a therapist is trained and uses supervision in order to make fuller use of her or his own reactions responses and experience in working with any one client The book is aimed primarily at counsellors and psychotherapists or trainees in these disciplines It has been written in a way that is accessible to students at all levels but it is also of particular value to existing practitioners with an interest in the problems of integration

**The State of College Access and Completion** Laura W. Perna,Anthony Jones,2013-07-18 Despite decades of substantial investments by the federal government state governments colleges and universities and private foundations students from low income families as well as racial and ethnic minority groups continue to have substantially lower levels of postsecondary educational attainment than individuals from other groups The State of College Access and Completion draws together leading researchers nationwide to summarize the state of college access and success and to provide recommendations for how institutional leaders and policymakers can effectively improve the entire spectrum of college access and completion Springboarding from a seminar series organized by the Advisory Committee on

Student Financial Assistance chapter authors explore what is known and not known from existing research about how to improve student success This much needed book calls explicit attention to the state of college access and success not only for traditional college age students but also for the substantial and growing number of nontraditional students Describing trends in various outcomes along the pathway from college access to completion this volume documents persisting gaps in outcomes based on students demographic characteristics and offers recommendations for strategies to raise student attainment Graduate students scholars and researchers in higher education will find The State of College Access and Completion to be an important and timely resource
