

High School Mathematics Lesson Plan: Algebra

Each lesson in the Adolescent Literacy Toolkit is designed to support students through the reading/learning process by providing instruction before, during, and after reading/learning.

Note that lessons incorporate the *gradual release of responsibility* model. When this model is used within a single lesson and over several lessons, students are provided with enough instruction and guidance to use the literacy strategies on their own. The following lesson includes some examples of explicit instruction and modeling, guided practice, and independent practice, but students need more practice and feedback than is possible within the context of a single lesson.

Instructional Outcomes

NCTM Standards: 10.1 Analyze patterns, relations, and functions of one and two variables.
1.4 Monitor and reflect on the process of mathematical problem solving.

Content Learning Outcome: Students will learn how to think about and connect mathematics text, examples, and exercises to determine when to use algebraic solutions to solve systems of equations.

Literacy Support Strategies and Instruction

Before reading/learning: Think-Aloud (teacher modeling)

- Materials: Sample of a real-life problem that demonstrates how elimination, addition, or subtraction can be used to solve a system of equations (see clothing sale example below)

During reading/learning: Think-Aloud (whole group guided practice)

- Materials: Text selection for using elimination, addition, or subtraction to solve a system of equations, and a prepared **Think-Aloud** on how to solve the system of equations (see sample below)

After reading/learning: Think-Aloud (individual/paired group practice)

- Materials: Text selection with explanation and examples of how to solve the system of equations by substitution, addition, or subtraction
