1. Determine your child's natural hair-color level using the **SPONSORING** level. Record brown/blonde/red levels, counting strands the color band. Remember to consider percentage of gray hair texture, condition and hair density.

- 1) Create the `Person` and `Address` instances. Instance id used to address the target entity.
- ```

Person p = new Person(1);
Address a = new Address(1);

**Abstract.** In the previous literature, the relationship between the number of countries and the number of variables in the model has been examined. However, the relationship between the number of countries and the number of variables in the model has not been examined. This paper examines the relationship between the number of countries and the number of variables in the model. The results show that the number of countries and the number of variables in the model are positively related. The number of countries and the number of variables in the model are positively related. The number of countries and the number of variables in the model are positively related.
