- **Exponential** (Wenger et al., 1998) and **Logistic** (Wenger et al., 1998) models are used to model the number of people who will use a new technology over time.
- **Computer** (Wenger et al., 1998) and **Network** (Wenger et al., 1998) models are used to model the number of people who will use a new technology over time.

- **Interlocking 12** is a design rule that restricts connections to the nearest neighbouring pin (see below)
- The same connectivity constraint can be implemented using design rules that restrict connections to nearest different connectivity domains (connected components) and avoid the design-to-manufacture connectivity
- Explicitly-defined connectivity constraints reflecting connectedness between design components can be used to restrict design-to-manufacture connectivity
