

Laboratory Activity #1 — Student Laboratory Packet

Relationships and Biodiversity*A Laboratory Activity for the Living Environment***Introduction**

Botana curus is a valuable plant because it produces Curol, a compound used for treating certain kinds of cancer. Curol cannot be produced in the laboratory. *Botana curus* grows very slowly and is on the endangered species list, so its ability to provide Curol in large quantities is limited.

Species that are more closely related to *Botana curus* are more likely to produce the important substance Curol. Three similar plant species that are plentiful (X, Y, and Z) may be related to *Botana curus*. You will work as a researcher to:

- gather structural and molecular evidence to determine which plant species is most closely related to the hypothetical species, *Botana curus*
- use this evidence to decide which plant species is most likely to serve as a source of the important substance Curol

Safety

- You will need to wear goggles while conducting Tests 4 and 5.
- Do not eat or drink anything in the laboratory while doing this laboratory activity.

Important Note: Record all of your data and answers on these laboratory sheets. You will need to keep them for review before the Regents Examination. Later, you will need to transfer your answers to a separate Student Answer Packet. Your teacher will use the packet in grading your work, and the school will retain it as evidence of your completion of the laboratory requirement for the Living Environment Regents Examination.

Structural Evidence for Relationships

Perform the following tests and record your observations in Table 1 on page 8 of this packet. Use a hand lens or microscope as needed.

Test 1-Structural Characteristics of Plants

- Do not remove the plant samples from the plastic bags/cards.
- Compare the structural characteristics of the plant samples. Record your observations in Table 1 (see page 8).

Test 2-Structural Characteristics of Seeds

- Do not remove the seed samples from the plastic bags/cards.
- Compare the structural characteristics of the seed samples. Record your observations in Table 1.

"Relationships and Biodiversity" is a laboratory activity produced by the State Education Department for use in fulfilling part of the laboratory requirement for the Regents Examination in Living Environment. Reproducing any part of this laboratory activity by other than New York State school personnel is illegal.

Biodiversity and Ecosystem Functioning Martin Solan, Rebecca J. Aspden, David M. Paterson, 2012-07-19 This edited volume is the first to address the latest advances in biodiversity function science using marine examples It provides an in depth evaluation of the science before offering a perspective on future research directions for some of the most pressing environmental issues facing society today and in the future **Effects of Non-Random Sources of Alteration on**

Biodiversity and Ecosystem Functioning Tian Zhao, Chuanbo Guo, Chao Wang, Chunsheng Liu, Paraskevi Manolaki, 2023-11-15 Understanding how biological diversity affects ecosystem functioning is a key question in modern ecology This is of particular importance in the general context of recent global changes caused by human activities such as water abstraction flow regulation shifts in agricultural practices contamination climate changes and biological invasions

These changes are affecting biodiversity ecosystem functioning and their complex interactions simultaneously. However, our ability to understand how genes, individuals, populations, communities, and ecosystems may respond to such changes is limited, despite ecologists frequently being requested to provide policymakers and managers with predictions. Indeed, the species that composed biodiversity can establish complex trophic links between them in the ecosystems. This structure of food webs is under the permanent constraint of community dynamics, which connects species, populations, communities, and ecosystems. Therefore, the response of food webs to perturbations can help ecologists to better understand the relationship between biological diversity and ecosystem functioning.

Nature's Tapestry: Uncovering the Beauty and Importance of Biodiversity Juan Armando Sánchez, 2023-10-09 We cannot separate human beings from biodiversity. Our vital functions and our health are synergistic with other species. The number of microorganisms we live with is greater than the total number of cells in our bodies. So separation from biodiversity and its loss are the greatest threats to human survival, and the current model for human development affects our very lives. We must integrate marine and terrestrial life to understand our interdependence with biodiversity. Colombia, a megadiverse country with access to two oceans, is the perfect canvas on which to illustrate this message: nature has sustainable and straightforward solutions to society's emerging problems. The new challenges of a changing environment raise increasingly relevant questions that we must address to prosper as individuals and as a society. Can we prevent a new pandemic of viral origin? How will we feed a constantly growing population? How will the extinction of biological species affect us? Do we function the same as all other living beings? Are our bodies entire ecosystems for other species? Is there a better model for economic development? This book presents an approach to these discussions based on Colombia's biodiversity to uncover biodiversity's beauty and importance: our nature's tapestry. What we have here is an opportunity that we cannot miss.

Making Thinking Visible Ron Ritchhart, Mark Church, Karin Morrison, 2011-03-25 A proven program for enhancing students' thinking and comprehension abilities. Visible Thinking is a research-based approach to teaching thinking, begun at Harvard's Project Zero, that develops students' thinking dispositions while, at the same time, deepening their understanding of the topics they study. Rather than a set of fixed lessons, Visible Thinking is a varied collection of practices, including thinking routines (small sets of questions or a short sequence of steps) as well as the documentation of student thinking. Using this process, thinking becomes visible as the students' different viewpoints are expressed, documented, discussed, and reflected upon. Helps direct student thinking and structure classroom discussion. Can be applied with students at all grade levels and in all content areas. Includes easy-to-implement classroom strategies. The book also comes with a DVD of video clips featuring Visible Thinking in practice in different classrooms.

The Bahía Blanca Estuary Sandra M. Fiori, Paula D. Pratolongo, 2021-08-03 The Bahía Blanca Estuary is one of the largest coastal

systems in Atlantic South America This mesotidal estuary situated in a sharp transition between humid subtropical and semiarid climates has a unique combination of large interannual climatic variations The estuarine area encompasses roughly 2300 square kilometers and is composed of wide expanses of intertidal flats salt marshes and emerged islands which create intricate landscape patterns Natural environments in the estuary sustain a high concentration of marine and terrestrial species including endemic threatened and endangered fish and shorebirds Puerto Cuatrerros in the inner zone of the estuary hosts a permanent marine research station whose records span more than 30 years of biophysical variables and represent one of the largest time series of ecological data in South America Beyond its ecological relevance the Bah a Blanca Estuary is under increasing anthropogenic pressure from large urban settlements industrial developments and harbors raising the question of how to balance conservation and development The Bah a Blanca Estuary Ecology and Biodiversity offers a comprehensive review of life in the ecosystems of the estuary The book is divided into five major sections the first of which provides a description of the regional setting and covers key aspects of estuarine dynamics The three following sections are dedicated to different habitat types and within each section the chapters are organized around major functional groups from pelagic and benthic environments The fifth and final section covers issues related to management and conservation Overall the book provides essential and up to date reference material on the biodiversity and ecosystem processes of the Bah a Blanca Estuary and will appeal to a broad international audience

Lactic Acid Bacteria Wilhelm H. Holzapfel, Brian J.B. Wood, 2014-04-29 Lactic Acid Bacteria Biodiversity and Taxonomy Lactic Acid Bacteria Biodiversity and Taxonomy Edited by Wilhelm H Holzapfel and Brian J B Wood The lactic acid bacteria LAB are a group of related microorganisms that are enormously important in the food and beverage industries Generally regarded as safe for human consumption and in the case of probiotics positively beneficial to human health the LAB have been used for centuries and continue to be used worldwide on an industrial scale in food fermentation processes including yoghurt cheeses fermented meats and vegetables where they ferment carbohydrates in the foods producing lactic acid and creating an environment unsuitable for the survival of food spoilage organisms and pathogens The shelf life of the product is thereby extended but of course these foods are also enjoyed around the world for their organoleptic qualities They are also important to the brewing and winemaking industries where they are often undesirable intruders but can in specific cases have desirable benefits The LAB are also used in producing silage and other agricultural animal feeds Clinically they can improve the digestive health of young animals and also have human medical applications This book provides a much needed and comprehensive account of the current knowledge of the LAB covering the taxonomy and relevant biochemistry physiology and molecular biology of these scientifically and commercially important microorganisms It is directed to bringing together the current understanding concerning the organisms remarkable diversity within a seemingly rather constrained compass The genera now identified as proper members of the LAB are treated in dedicated chapters and the species properly recognized as members of each genus are

listed with detailed descriptions of their principal characteristics Each genus and species is described using a standardized format and the relative importance of each species in food agricultural and medical applications is assessed In addition certain other bacterial groups such as Bifidobacterium often associated with the LAB are given in depth coverage The book will also contribute to a better understanding and appreciation of the role of LA B in the various ecosystems and ecological niches that they occupy In summary this volume gathers together information designed to enable the organisms fullest industrial nutritional and medical applications Lactic Acid Bacteria Biodiversity and Taxonomy is an essential reference for research scientists biochemists and microbiologists working in the food and fermentation industries and in research institutions Advanced students of food science and technology will also find it an indispensable guide to the subject Also available from Wiley Blackwell The Chemistry of Food Jan Velisek ISBN 978 1 118 38384 1 Progress in Food Preservation Edited by Rajeev Bhat Abd Karim Alias and Gopinadham Paliyath ISBN 978 0 470 65585 6

Handbook of STEM Faculty Development Sandra M. Linder, Cindy M. Lee, Shannon K Stefl, Karen A. High, 2022-12-01 Faculty in the science technology engineering and mathematics STEM disciplines face intensifying pressures in the 21st century including multiple roles as educator researcher and entrepreneur In addition to continuously increasing teaching and service expectations faculty are engaged in substantive research that requires securing external funding mentoring other faculty and graduate students and disseminating this work in a broad range of scholarly outlets Societal needs of their expertise include discovery innovation and workforce development It is critical to provide STEM faculty with the professional development to support their complex roles and to base this development on evidence derived from research This edited handbook provides STEM stakeholders with an opportunity to share studies and or experiences that explore STEM faculty development FD in higher education settings More specifically we include work that examines faculty development planning techniques models experiences and outcomes focused on supporting the teaching research service and leadership responsibilities of STEM faculty The Handbook is suited for researchers and practitioners in STEM STEM Education Mathematics Science Technology and Engineering disciplines It is also suited towards faculty developers higher education administrators funding agencies industry leaders and the STEM community at large This handbook is organized around three constructs INPUTS MECHANISMS and OUTPUTS The STEM faculty development inputs construct focuses on topics related to the characteristics of faculty members and institutions that serve as barriers or supports to the adoption and implementation of holistic STEM faculty development programs Questions addressed in the handbook around this topic include What barriers supports exist for STEM faculty How are these barriers supports being addressed through STEM FD How do contexts e g economic political historical influence faculty administrative needs related to STEM FD How do demographics e g gender ethnicity age family background influence faculty administrative needs related to STEM FD The STEM faculty development mechanisms construct focuses on topics related to the actual implementation of STEM faculty development and we consider the potential models or structures of

STEM faculty development that are currently in place or conceptualized in theory Questions addressed in the handbook around this topic include What are the processes for developing models of STEM FD What are effective models of STEM FD How is effectiveness determined What roles do stakeholders e g faculty administration consultants play within STEM FD mechanisms The STEM faculty development outputs construct focuses on how to best understand the influence of STEM faculty development on outcomes such as productivity teacher quality and identity in relation to faculty development Questions addressed in the handbook around this topic include How has STEM FD influenced higher education practices and settings What are appropriate output measures and how are they used in practice What collaborations emerge from STEM FD How does STEM FD affect other STEM stakeholders e g students administration business community The aim for this handbook was to examine the multifaceted demands of faculty roles and together with members of the STEM education community envision pathways through which universities and individuals may support STEM colleagues regardless of their experience or rank to enjoy long and satisfying careers Our hope is for these chapters to aid readers in deep reflection on challenges faculty face to contemplate adaptations of models presented and to draw inspiration for creating or engaging in new professional development programs Chapters across this handbook highlight a variety of institutional contexts from 2 year technical colleges to teaching focused institutions in addition to research centric settings Some chapters focus primarily on teaching and learning practices and offer models for improving STEM instruction Others focus on barriers that emerge for STEM faculty when trying to engage in development experiences There are chapters that examine tenure structures in relation to faculty development and how STEM FD efforts could support research endeavors Mentorship and leadership models are also addressed along with a focus on equity issues that permeate higher education and impact STEM FD It is our sincere hope that this Handbook sparks increased discourse and continued explorations related to STEM FD and in particular the intentional focus of faculty development initiatives to extend to the many facets of academic life

Data Journeys in the Sciences Sabina Leonelli, Niccolò Tempini, 2020-06-29 This groundbreaking open access volume analyses and compares data practices across several fields through the analysis of specific cases of data journeys It brings together leading scholars in the philosophy history and social studies of science to achieve two goals tracking the travel of data across different spaces times and domains of research practice and documenting how such journeys affect the use of data as evidence and the knowledge being produced The volume captures the opportunities challenges and concerns involved in making data move from the sites in which they are originally produced to sites where they can be integrated with other data analysed and re used for a variety of purposes The in depth study of data journeys provides the necessary ground to examine disciplinary geographical and historical differences and similarities in data management processing and interpretation thus identifying the key conditions of possibility for the widespread data sharing associated with Big and Open Data The chapters are ordered in sections that broadly correspond to different stages of the journeys of data from their generation to the legitimisation of

their use for specific purposes Additionally the preface to the volume provides a variety of alternative roadmaps aimed to serve the different interests and entry points of readers and the introduction provides a substantive overview of what data journeys can teach about the methods and epistemology of research

Transdisciplinary Research for Understanding and Transforming Food Systems Alexandros Gasparatos, Laura M. Pereira, Cyrille Rigolot, 2023-10-30 Food systems are currently facing tremendous challenges and changes globally On the one hand population growth urbanization and increased affluence are expected to catalyze dietary shifts and broader changes to food systems in the coming decades On the other hand food systems and changes therein have major environmental and social ramifications As a result fostering the sustainable transformation of food systems is seen as one of the major challenges for meeting the Sustainable Development Goals SDGs However understanding food systems and transforming them in a sustainable manner is far from straightforward especially as our food systems have multiple intersecting economic social technological and cultural dimensions Moreover food systems encompass different stakeholders operating at different levels with enormously different interests and worldviews
