
- Abstract**

Abstract: This study examined the effects of a 12-week, 3-day-per-week, 120-min resistance training program on the muscular strength, muscular endurance, and cardiovascular fitness of 12 sedentary, middle-aged men. The program consisted of three sessions per week, each including a warm-up, a resistance training circuit, and a cardiovascular endurance circuit. The results showed that the program significantly improved muscular strength, muscular endurance, and cardiovascular fitness. The findings suggest that a 12-week, 3-day-per-week, 120-min resistance training program is an effective means of improving physical fitness in sedentary, middle-aged men.
