Reflecting on Practice for STEM Educators Lynn Uyen Tran,Catherine Halversen,2021-05-30 Reflecting on Practice for STEM Educators is a guidebook to lead a professional learning program for educators working in STEM learning environments Making research on the science of human learning accessible to educational professionals around the world this book shows educators how to relate this research to their own practice Educators collective work broadens the scope of an organization s reach and through this effort the organization grows its social capital in its local community and beyond This book offers opportunities to engage in processes that lead toward organizational learning by attending to the professional growth of the educators Tran and Halversen show how learning together can shape the language and meanings

by which educators do and talk about their work to support visitors experiences The book provides guidance on how teams of educators can build community as they engage in reflective practice Reflecting on Practice for STEM Educators will be essential reading for leaders of any organization that aims to educate and engage the public in science technology engineering and mathematics It will be particularly useful to educators who work in museums zoos aquariums botanical gardens youth organizations after school programs and nature science and conservation centres

An Inquiry into Science Education, Where the Rubber Meets the Road Richard N. Steinberg, 2012-01-01 An inquiry into science education is an exploration into education in a context that is grounded and significant It is written by a college professor of Physics and Science Education who spent sabbatical year as a full time science teacher in a neighborhood high school in a poor area of New York City His varied experiences highlight the contrast of what science education is and what it can be The framework through which the book is written is that science education should be an active purposeful process which promotes functional understanding and critical thinking Science learners should be given the opportunity to build an understanding of benchmark principals of science based on their own observations and reasoning In much the same way this book explores benchmark principals of science education through real classroom experiences Standard approaches of teaching and assessment are presented and alternative opportunities are described Theories and strategies of science education emerge from analysis of classroom observations Although the focus is on the teaching and learning of science the subtext is implications of a failing educational system and what can be done about it The primary intended audience is educators of all capacities but particularly science teachers An inquiry into science education integrates critical topics of science education in a contextualized accessible and easy to read narrative The secondary intended audience is non fiction readers This book examines educational issues relevant to a general audience from the perspective of a scientist with a focus on inquiry and reasoning Critical issues are addressed through case histories some with touches of humor but all with insight into children and learning

Board of Regents, 1891 *Research Methods in Applied Behavior Analysis* Alan Poling, R. Wayne Fuqua, 2013-03-08 The branch of clinical psychology known as behavior modification or synonymously applied behavior analysis has grown substantially from humble beginnings in the 1960s Many colleges and universities now offer courses in applied behavior analysis and more than a few grant degrees in the area Although they remain controversial behavior modification procedures have been used to good advantage in dealing with a range of problem behaviors and are now rather widely employed in schools residential institutions and other therapeutic facilities The two hallmarks of applied behavior analysis are utilization of the principles of operant conditioning to improve human behavior and utilization of scientific research methodology to assess the effectiveness of treatments The present text provides an overview of several issues peculiar to applied behavior analysis research methodology Six general areas of

concern are a trends in applied behavior analysis research b assessment and measurement issues c experimental designs and strategies d interpretation of findings e ethical issues in applied behavior analysis and f the societal impact of studies in the area As evidenced by a sizable number of recently published articles these topics are of considerable interest to behavior analysts They also are relevant for students of scientific epistemology and general psychological research methods
