Station 4 - Paper Chromatography to Separate Plant Pigments

1. Take four strips of chromatography paper and try to straighten them the best you can by curling them in the opposite direction and putting a slight crease down the center (see example setup on the bench).
2. Draw a line 2 cm from the bottom of each of the four chromatography papers. Use a pencil to label the top edge of the chromatography paper either Bc (*Botanus curus*), X, Y, or Z (look at Figure 2 in the lab manual).

Biodiversity of Fungi Mercedes S. Foster, Gerald F. Bills, 2011-04-28 Biodiversity of Fungi is essential for anyone collecting and or monitoring any fungi Fascinating and beautiful fungi are vital components of nearly all ecosystems and impact human health and our economy in a myriad of ways Standardized methods for documenting diversity and distribution have been lacking A wealth of information especially regarding sampling protocols compiled by an international team of fungal biologists make Biodiversity of Fungi an incredible and fundamental resource for the study of organismal biodiversity Chapters cover everything from what is a fungus to maintaining and organizing a permanent study collection with associated databases from protocols for sampling slime molds to insect associated fungi from fungi growing on and in animals and plants to mushrooms and truffles The chapters are arranged both ecologically and by sampling method rather than by taxonomic group for ease of use The information presented here is intended for everyone interested in fungi anyone who needs tools to study them in nature including naturalists land managers ecologists mycologists and even citizen scientists and sophisticated amateurs Covers all groups of fungi from molds to mushrooms even slime molds Describes sampling protocols for many groups of fungi Arranged by sampling method and ecology to coincide with users needs Beautifully illustrated to document the range of fungi treated and techniques discussed Natural history data are provided for each group of fungi to enable users to modify suggested protocols to meet their needs *Reviewing the Living Environment Biology* Rick Hallman, Woody, 2004-04-19 This review book provides a complete review of a one year biology course that meets the NYS Living Environment Core Curriculum Includes four recent Regents exams *Cracking the AP Environmental Science Exam, 2014 Edition* Angela Morrow, Tim Liggett, 2013-09-03 Reviews topics covered on the test offers tips on test taking strategies and includes two full length practice tests with answers and explanations **A Manual of Practical Laboratory and Field Techniques in Palaeobiology** O.R. Green, 2013-03-09 The user This manual is designed for the use of geo scientists with an interest and need in developing palaeobiological materials as a potential source of data To meet this objective practical procedures have been formatted for use by both professional and semi professional students with an initial understanding of palaeo biological research aims as a primary source of scientific data I have attempted to provide an explanation and understanding of practical procedures which may be required by students undertaking palaeobiological projects as part of a degree course The layout of this manual should be particularly beneficial in the instruction and training of geotechnologists and museum preparators Graduate students and scientists requiring an outline of a preparation procedure will also be able to use the manual as a reference from which to assess the suitability of a procedure This manual is also intended for use by the committed amateur Many of the techniques described in this manual have been devised by non palaeontologists and developed from methods used in archaeology zoology and botany as well as other areas of geology A considerable number of the methods can be undertaken by the amateur and in the case of many of the field procedures

should be used This will ensure that specimens and samples can be conserved in such a manner as to facilitate any later research and not invalidate the results of subsequent geochemical analytical techniques which might be employed
