Author: Nekisa Mahzad

I have been a student at California State University Channel Islands (CI) for 5 semesters, and over the course of my stay I have grown and learned more than I thought possible. I came to this school from Moorpark Community College already knowing that I wanted to be an English teacher; I had taken numerous English courses and though I knew exactly what I was headed for—was I ever wrong. Going through the English program has taught me so much more than stuff about literature and language, it has taught me how to be me. I have learned here how to write and express myself, how to think for myself, and how to find the answers to the things that I don't know. Most importantly I have learned how important literature and language are.

When I started at CI, I thought I was going to spend the next 3 years reading classics, discussing them and then writing about them. That was what I did in community college English courses, so I didn't think it would be much different here. On the surface, to an outsider, I am sure that this is what it appears that C.I. English majors do. In most all my classes I did read, discuss, and write papers; however, I quickly found out that that there was so much more to it. One specific experience I had while at C.I. really shows how integrated this learning is. Instead of writing a paper for my final project in Perspectives of Multicultural Literature (ENGL 449), I decided with a friend to venture to an Indian reservation and compare it to a book we read by Sherman Alexie. We had a great time and we learned so much more that we ever could have done from writing a paper. The opportunity to do that showed me that there are so many ways that one can learn that are both fun and educational.

The English courses also taught me how powerful the written word and language can be. Words tell so much more than a story. Stories tell about life and the human condition, they bring up the past and people and cultures that are long gone. Literature teaches about the self and the world surrounding the self. From these classes I learned about the world, its people and its history; through literature I learned how we as humans are all related. By writing about what we learn and/or what we believe, we are learning how to express ourselves.

I know that my ability to write and express my ideas, thoughts and knowledge has grown stronger each semester. I have always struggled to put my thoughts on paper in a manner that is coherent and correct according to assignments. I can remember being told numerous times in community college to "organize your

Handbook of Research on Creating Meaningful Experiences in Online Courses Kyei-Blankson, Lydia, Ntuli, Esther, Blankson, Joseph, 2019-11-29 While online courses are said to be beneficial and many reputable brick and mortar higher education institutions are now offering

undergraduate and graduate programs online there is still ongoing debate on issues related to credibility and acceptability. There is some reluctance to teach online and to admit and hire students who have enrolled in online programs. Given these concerns, it is essential that educators in online communities continue to share the significant learning experiences and outcomes that occur in online classrooms and highlight pedagogical practices used by online instructors to make their courses and programs comparable to those offered face to face.

The *Handbook of Research on Creating Meaningful Experiences in Online Courses* is a comprehensive research book that examines the quality of courses in higher education that are offered exclusively online and details strategies and practices used by online instructors to create meaningful teaching and learning experiences in online courses. Handbook of Reflection and Reflective Inquiry Nona Lyons, 2010-04-07 Philosophers have warned of the perils of a life spent without reflection, but what constitutes reflective inquiry and why it is necessary in our lives can be an elusive concept. Synthesizing ideas from minds as diverse as John Dewey and Paulo Freire, the *Handbook of Reflection and Reflective Inquiry* presents reflective thought in its most vital aspects, not as a fanciful or nostalgic exercise but as a powerful means of seeing familiar events anew, encouraging critical thinking and crucial insight in teaching and learning. In its opening pages, two seasoned educators, Maxine Greene and Lee Shulman, discuss reflective inquiry as a form of active attention. Thoreau's wide awakeness, an act of consciousness and a process by which people can understand themselves, their work, particularly in the form of life projects, and others. Building on this foundation, the Handbook analyzes through the work of 40 internationally oriented authors definitional issues concerning reflection: what it is and is not, worldwide social and moral conditions contributing to the growing interest in reflective inquiry in professional education, reflection as promoted across professional educational domains including K-12 education, teacher education, occupational therapy, and the law, methods of facilitating and scaffolding reflective engagement, current pedagogical and research practices in reflection, approaches to assessing reflective inquiry, educators across the professions as well as adult educators, counselors, and psychologists, and curriculum developers concerned with adult learning. Those who will find the Handbook of Reflection and Reflective Inquiry an invaluable teaching tool for challenging times.
