Loose-leaf Version for Sensation and Perception

Steven Yantis, 2013-02-11 **Sensation and Perception** E. Bruce Goldstein, 2007 Bruce Goldstein's SENSATION AND PERCEPTION the best seller which has helped over 150 000 students understand the ties between how we sense the world and how the body interprets these senses is now in a brilliant full color Seventh Edition A key strength of this text has always been the ability to show the student what they are learning through examples and visuals Now the book takes this visual learning one step further by using color throughout as a learning tool As the sole author of the text Goldstein's singular voice combines with his extensive classroom experience and most innovative research to create a visual text unparalleled in the field The text walks the student through an intriguing journey of the senses with a mixture of clarity and thoroughness The accompanying Virtual Lab media exercises available both on CD ROM within the Perception PsychologyNow™ student tutorial platform and in the online WebTutor™ Advantage product offer a wide array of animations and examples designed to stimulate understanding of difficult concepts Every chapter has been updated for currency and readability and a new chapter six on Visual Attention rounds off this timely revision Development of Perception Psychobiological Perspectives

Richard Aslin, 2012-12-02 Development of Perception Psychobiological Perspectives Volume 1 Audition Somatic Perception and the Chemical Senses is the first of a two part series covering vision audition olfaction taste tactile sensitivity and sensory motor activity during ontogenesis The focus is on approaches to perceptual development that incorporate a psychobiological perspective The present volume contains both overviews and specific discussions of audition somatic perception and the chemical senses aimed at the anatomical neurophysiological and behavioral levels The book is organized into four parts Parts A and B are devoted to aspects of auditory perceptual development in animals and humans respectively These include studies

on the development of species specificity in duckling auditory perception the functional role of auditory perception in parent offspring recognition in birds the development of auditory localization in human infants and experiential components in the development of speech perception Part C covers issues of somatosensory and sensorimotor development including pioneering studies of development and plasticity in the neural structures of specialized somatosensory areas Part D contains chapters on the development of olfaction and taste

Sensation and Perception Steven Yantis, 2013-02-11 Written by acclaimed researcher and teacher Steven Yantis *Sensation and Perception* shows students how scientists investigate and understand sensory and perceptual phenomena today Like no other textbook for the course it integrates classic and current research including the latest developments in cognitive neuroscience and brain imaging into a highly accessible portrait of the field s defining principles and experiments Engagingly written filled with outstanding art including 3 D images and supported by dozens of interactive visual demonstrations devised by the author it is your students gateway to the forefront of research in sensation and perception

The Logic of Perception , 1985 **Perception Through Experience** M.D. Vernon, 2017-03-13 The term visual perception covers a very wide range of psychological functions This title originally published in 1970 which provides a broad survey of this vast field of knowledge would have proved a valuable general account for students taking degree courses in psychology at the time Professor Vernon examines a large number of experiments carried out over the previous twenty years their findings the conclusions drawn from them and equally important the still unanswered questions which some of them raised As the title suggests Professor Vernon considers that while much knowledge of the simpler perceptual processes had been gained in laboratory experiments perhaps too little investigation had been undertaken into the more complex processes which normally determine understanding of and response to environment the processes of identification and classification that depend to a considerable extent on learning memory attention reasoning and language An extensive bibliography is provided
