

Performance Task

Production Schemes

1. Factory in Wichita, Kansas

- a. Write one or two sentences to describe the cost function for the Wichita factory.

The cost of producing 25,000 units is \$1. From 25,001 units to 35,000 units the cost lowers to \$0.80.

- b. Write the piecewise function for the cost per unit for production of units in the Wichita factory. That is, state the function $C(x)$, where x is the number of units produced.

$$f(x) = \begin{cases} \$1, & \text{for } 1 \leq x < 25,000 \\ \$0.80, & \text{for } 25,000 < x \leq 35,000 \end{cases}$$

- c. What is the cost per unit for 35,000 units?

$$\text{Cost per unit for 35000 units} = C(35000) = \frac{0.8}{35000} = 2.28(10^{-5})$$

- d. According to the graph, if only one unit was produced, the cost per unit would be \$1.00. In reality, the company would not call in its workers and start up the equipment to produce one unit. What safeguard do you think that many manufacturers use to avoid this type of problem?

The factory would study the expenses involved with setting the factory into production, wages for workers' salaries, and other factory running expenses into the total cost of producing the units (such would obviously drastically change the graph from the one presented), and make sure that there is a threshold at least on the "breaking even" with the estimated revenue coming from the units produced/ordered.

- e. Of the following three statements, choose the best option and write a viable argument showing how it is reflected by the Cost Function for Wichita's factory.

The plant's production processes are performed primarily by robots that are able to work longer hours, when needed, at no additional cost.

Handbook of Scheduling Joseph Y-T. Leung, 2004-04-27 Researchers in management industrial engineering operations and computer science have intensely studied scheduling for more than 50 years resulting in an astounding body of knowledge in this field Handbook of Scheduling Algorithms Models and Performance Analysis the first handbook on scheduling provides full coverage of the most recent and advanced topics on the subject It assembles researchers from all relevant disciplines in order to facilitate cross fertilization and create new scheduling insights The book comprises six major parts each of which breaks down into smaller chapters Part I introduces materials and notation with tutorials on complexity theory and algorithms for the minimization of makespan total completion time dual objectives maximum lateness the number of late jobs and total tardiness Part II is devoted to classical scheduling problems Part III explores scheduling models that originate in computer science operations research and management science Part IV examines scheduling problems that arise in real time systems focusing on meeting hard deadline constraints while maximizing machine utilization Part V discusses stochastic scheduling and queueing networks highlighting jobs that are not deterministic Part VI covers applications discussing scheduling problems in airline process and transportation industries as well as in hospitals and educational institutions

The End of Project Overruns Robert M. Patty, Michael A. Denton, 2009-11 Applying the principles in this book unleashes ingenuity that achieves solidifies and perpetuates a new performance culture of mutual benefit In this culture project teams will prepare their work in task packages and enable workflow necessary to leave inefficiency of time and resource literally no place to hide Project examples will help teams implement the principles that shorten cycle times eliminate error improve quality and reduce costs to succeed in meeting project commitments Emerging Lean enterprise relationships between clients EPC contractors and their entire supply chain will advance what constitutes the new market differentiating performance of individuals project teams and companies justifying high levels of trust and inter organizational efforts to improve Client executives will learn to recognize root causes of risk and sources of excellence to mitigate them Well developed strategic improvement is often constrained because the traditional way current means and methods fit squarely in everyone's comfort zone By learning to ask the right questions top client leadership will soon render overruns from the best traditional systems as not good enough and strive for a new level of excellence EPC executives will better engage creative voices from their best resources and stakeholders to resolve all concerns and define a unified vision for how to deliver on clients expectations without overruns during capital project delivery Lean methods will effectively assure that vision principles and best expectations are understood and implemented at the workplace Department discipline and stakeholder leaders will align and no longer frustrate each other and their clients They will plan and execute with increased efficiency and effectiveness Cost reduction will accelerate retaining only client valued quality enabling a nimble response to market opportunities and threats Project and program managers will confidently accept intense market induced cost and

schedule reduction efforts They will apply new metrics measure potential and extract align and pilot improvements They will make workforce progress transparent to simplify resource balancing full utilization and workforce flow during all project phases The results will differentiate team members and their project s performance on the world stage Project professionals and the skilled labor force will gain confidence to make and keep increasingly difficult commitments and experience thereby increasing opportunity in an organization known for excellence They will fully engage heart and mind for leaders who expect excellence and they trust to enable and reward best practice performance while they jointly eliminate root causes of problems before they happen This book guides readers through each essential role for the transformation to Lean not just at the lowest levels but of the entire business model and all the supporting processes Resulting market recognition of sustained excellence of people their systems and they way they work together will create a market leading force *Pioneering Solutions in Supply Chain Performance Management* Thorsten Blecker,Wolfgang Kersten,Christian M. Ringle,2013-08-22 As competition between value chains on globalized markets is constantly getting fiercer there is a growing trend to achieve closer collaboration and integration within these value chains and increasingly more complex supply networks Additionally in the wake of the thrilling possibilities of using information technology and its potential in boosting the performance of supply chains researchers are increasingly looking for technology enabled solutions for a better supply chain performance management This volume edited by Thorsten Blecker Wolfgang Kersten and Christian Ringle provides valuable insights into Maritime Logistics Challenges and Opportunities Leveraging Logistics Processes for Supply Chain Performance Management Innovative Technology Solutions in Supply Chains Knowledge Management in Logistics This volume appeals to researchers and practitioners alike who are interested in current contributions by international authors providing theoretical empirical and case study oriented background and information on their research work *Learning in the Digital Era* Daryl John Powell,Erlend Alfnes,Marte D. Q. Holmemo,Eivind Reke,2022-01-01 This book constitutes the refereed proceedings of the 7th European Lean Educator Conference ELEC 2021 hosted in Trondheim Norway in October 2021 and sponsored by IFIP WG 5.7 The conference was held virtually The 42 full papers presented were carefully reviewed and selected from 82 submissions They are organized in the following thematic sections Learning Lean Teaching Lean in the Digital Era Lean and Digital Lean 4.0 Lean Management Lean Coaching and Mentoring Skills and Knowledge Management Productivity and Performance Improvement New Perspectives of Lean *Accounting for Management Control* David Otley and Kenneth Merchant Clive Emmanuel,2013-11-21 Covers all aspects of accounting management for both programmed and non programmed activities At the end of each chapter there is a set of exercises to facilitate understanding of the topics discussed and case studies have been included in the final chapter *Developing Auto-instructional Materials* A.J. Romiszowski,2013-12-16 This two volume work on the development of instruction is planned as a companion to an earlier book Designing Instructional Systems The present work continues the micro design stages of lesson and instructional materials development Taken together these two

volumes give extensive coverage of practical techniques for the development of instruction This title draws a distinction between instructional design and instructional development although some authors seem to use the two terms synonymously The structure of the content will enable the two volumes to be used conveniently as both initial reading or later reference material
