Contemporary astrologers claim that their craft is scientifically based and rationally consistent and above all that astrology works a belief shared by millions of Americans including highly visible political and media personalities As a result the practice of consulting the stars for advice has never been more popular or more dangerous Professional astronomers Roger B Culver and Philip A Ianna have produced a highly readable and well referenced response to the claims of astrologers This book points out the glaring inconsistencies associated with the basic concepts of modern astrology from the zodiac itself to the fabled Age of Aquarius Tracing humanity's historical fascination with the heavens that produced the celestial twins of astronomy and astrology the authors leave little doubt concerning the difference between astronomical science and astrological art form *Astrology True or False* offers a complete and extensive summary of available evidence on astrology's basic definitions concepts and effectiveness The authors research revealed thousands of predictions gone bust from the start of World War III to claims about the existence of an anti Earth orbiting on the other side of the sun They studied the famous twenty year cycle of presidential death and disaster the moon cycles of crime and murder in major cities and the incidences of major personality traits in certain sun signs Their conclusions while disappointing to the determined believer in astrology are nevertheless refreshingly rational *The Only Astrology Book You'll Ever Need* Joanna Martine Woolfolk, 2012-11-13
