Challenging the School Readiness Agenda in Early Childhood Education Miriam B. Tager, 2017-03-27 Challenging the normative paradigm that school readiness is a positive and necessary objective for all young children this book asserts that the concept is a deficit based practice that fosters the continuation of discriminatory classifications Tager draws on findings of a qualitative study to reveal how the neoliberal agenda of school reform based on high stakes testing sorts and labels children as non ready affecting their overall schooling careers Tager reflects critically on the relationship between race and school readiness showing how the resulting exclusionary measures perpetuate the marginalization of low income Black children from an early age Disrupting expected notions of readiness is imperative to ending practices of structural classism and racism in early childhood education Literacy Learning Clubs in Grades 4-8 Heather Kenyon Casey, 2017-05-02 Literacy learning clubs are highly motivating small group collaborations that can improve tweens and teens academic achievement support their social emotional development and increase their enjoyment of reading and writing This book explains the research basis for the author s approach and offers practical instructions for implementation in English language arts social studies science and mathematics classrooms illustrated with detailed case examples Links to the Common Core State Standards are identified and multimodal methods and new literacies emphasized throughout User friendly features include end of chapter reflection questions and suggested activities The Appendix provides reproducible planning forms and handouts that can be downloaded and printed in a convenient 8 1 2 x 11 size

Pressing Forward Kathryn M. Borman, Becky Smerdon, 2012-04-01 Pressing Forward Increasing and Expanding Rigor and Relevance in America s High Schools is organized to place secondary education specifically the goals of preparing young adults to be college and career ready in contemporary perspective emphasizing the changing global economy and trends in policy and practice High school students must be equipped with tools they need during and beyond high school for mapping their futures in a global and flat world that demands workers prepared to take up 21st century careers Following Thomas Freidman and other writers on the topic this book takes as its core premise that the world has been irrevocably altered by technology and that technology takes a prominent role in shaping post secondary education and career opportunities The challenges facing education and educators in a flattened world can best be addressed by creating opportunities for students

who are ready for a world in which they are expected to pursue learning throughout their lifetimes understand and use technology engage in active civic lives function well in ethnically diverse workplace settings and be willing to take risks Most of all however these individuals must be very well prepared during high school by taking advanced level mathematics science and other challenging coursework while at the same time actively engaging in collaborative creative endeavors that prepare them to continuously reinvent themselves to stay ahead of automation and outsourcing The book will be a unique and useful contribution to the education reform and policy literature as it examines secondary education at an historical moment the convergence of significant education spending and focus on high school reform Developed from diverse authors research programs on secondary education the chapters in this volume highlight both changing and steadfast features of high schools questioning if attempts to foster change whether tinkering around the edges or inventing a new way adequately address shortcomings in equity and excellence found in American high schools

An Empty Curriculum Sandra Stotsky,2015-02-19 Teachers cannot teach what they do not know This country has tolerated a weak licensing system for prospective teachers for decades This weak system has been accompanied by an increasingly emptier curriculum for most students depriving them of the knowledge and skills needed for self government An Empty Curriculum How Teacher Licensure Tests Lead to Empty Student Minds makes the case that the complete revision of the licensing system for prospective and veteran teachers in Massachusetts in 2000 and the construction of new or more demanding teacher licensing tests contributed significantly to the Massachusetts education miracle That miracle consisted of enduring gains in achievement for students in all demographic groups and in all regional vocational technical high schools since 2005 gains confirmed by tests independent of Massachusetts policy makers The immediate purpose of this book is to explain what Massachusetts did in 2000 to strengthen its teacher licensing and re licensing system to ensure that all teachers could teach to relatively strong K 12 standards Its larger purpose is to suggest that development of strong academic standards in all major subjects should be followed by complete revision of a state s teacher licensing system not as has been the case for several decades the development of K 12 student tests if this country wants to strengthen public education
