

FACT SHEET + WORKSHEET

ROUTE 66

• ROUTE 66 •

Route 66 is an iconic highway that stretches across the USA. It begins in downtown Chicago and ends at the Santa Monica Pier in California. The road was first started in 1926. Many songs, films and books have been written about Route 66. It is a true American icon.

The route became famous during the Great Depression in the 1930s. About 250,000 people travelled west along Route 66 to California to escape the Dust Bowl, an area in the south with no water and many dust storms.

About two weeks is needed to go on an all-American road trip of Route 66 with stops and lots of sightseeing. If you want to travel without stops and driving as fast as you can, then you will need no longer than 3 days. In fact, the original Route 66 no longer exists, but about 80% is still drivable.

• FACTS •

States	8 states
Length	3,940 km
Start	Downtown Chicago

Changing Teaching, Changing Teachers Keith Wood,Saratha Sithamparam,2020-11-23 A unique feature of this book is its
focus on engaging teachers themselves in changing teaching as a way to bring about teacher change through lesson study
and learning study The sequence changing teaching changing teachers is significant This approach to professional
development is not about telling teachers what and how they should teach to bring about change in their students learning
outcomes It is about empowering teachers to make their own decisions about what needs to change Empowering teachers in
this way has been identified as the soul of Japanese lesson study Cheng 2019 It is the soul which can so easily be
compromised when lesson study is adopted and inevitably it seems adapted in new contexts around the globe Without
teacher empowerment top down curriculum development is almost bound to fail In presenting the cases of collaborative
professional development included in this book care has been taken to include the teachers voices They are intended to be
the subjects and not the objects of our research into teachers professional development A Curriculum Design Manual for
Theological Education LeRoy Ford,2003-02-26 Features of A Curriculum Design Manual for Theological Education A
Learning Outcomes Focus by LeRoy Ford Fifteen complete descriptions for courses in various disciplines of theological
education All descriptions are in the learning outcomes format A complete set of goals and objectives upon which each
chapter is based These statements when combined with the goals and objectives for the manual itself constitute a complete
description for a course in Curriculum Design in Theological Education Guidelines for elaborating the essential elements of
curriculum design institutional purpose program division and department purposes scope educational goals and objectives
for learners multiple contexts methodology and instructional and administrative models Four hundred learning outcomes at
the level of meaningful performance An emphasis on making spiritual formation part of every course in the curriculum plan
Three essentials for the learning outcomes approach a statement of goals and objectives use of appropriate methods and
activities and development and use of appropriate testing and evaluation procedures An emphasis on the multiple contexts
which constitute an element of curriculum design Twenty questions which designers must confront in considering the role of
affective goals and objectives in curriculum design in theological education Appropriate reader response opportunities The
essentials of a core curriculum Glossary of terms used in curriculum design *An Introduction to Architectural Theory*

Harry Francis Mallgrave, David J. Goodman, 2011-03-16 A sharp and lively text that covers issues in depth but not to the point that they become inaccessible to beginning students An Introduction to Architectural Theory is the first narrative history of this period charting the veritable revolution in architectural thinking that has taken place as well as the implications of this intellectual upheaval The first comprehensive and critical history of architectural theory over the last fifty years surveys the intellectual history of architecture since 1968 including criticisms of high modernism the rise of postmodern and poststructural theory critical regionalism and tectonics Offers a comprehensive overview of the significant changes that architectural thinking has undergone in the past fifteen years Includes an analysis of where architecture stands and where it will likely move in the coming years
