**Archaeology in the Holy Land** Kathleen Mary Kenyon,1985      **Archaeology in the Holy Land** Kathleen M.

Kenyon,1960 The emphasis in this book is on the first word in its title archaeology It does not claim to be a complete history for in the historical period literary evidence can give a much more detailed political religious and economic picture than has here been attempted But nevertheless a story of Palestine is the framework of the book with the emphasis upon the contribution that archaeology can make Down to c 3000 B C archaeology alone can write the story As the story is gradually merged into history archaeology still plays a very large part Only in the first millennium B C can history provide a reasonably consecutive story and even then it would remain a one sided unbalanced story without the help of archaeology This book therefore aims at showing the evidence that writes the story for the prehistoric period and in the historic periods concentrates on the evidence which supplements the written record using this only as a background for the archaeological material An excellent book has already been written by Professor Albright on the archaeology of Palestine But this appeared in 1949 and gave the picture provided by pre war archaeology for active field archaeology was virtually at a standstill between 1936 and 1952 Since then much has happened for Palestinian archaeology in both Jordan and Israel is an extremely live affair as all branches of archaeology should be The great modifications and amplifications for which fresh discoveries have provided the evidence is the justification for a new book      **Routledge Library Editions: Victorian Theatre**

Nasasra,2019-07-01 Presenting the current debate about cities in the Middle East from Sana a Beirut and Jerusalem to Cairo Marrakesh and Gaza the book explores urban planning and policy migration gender and identity as well as politics and economics of urban settings in the region This handbook moves beyond essentialist and reductive analyses of identity urban politics planning and development in cities in the Middle East and instead offers critical engagement with both historical and contemporary urban processes in the region Approaching Cities as multi dimensional sites products of political processes knowledge production and exchange and local and global visions as well as spatial artefacts Importantly in the different case

studies and theoretical approaches there is no attempt to idealise urban politics planning and everyday life in the Middle East which as with many other cities elsewhere are also situations of contestation and violence but rather to highlight how cities in the region and especially those which are understudied revolve around issues of housing infrastructure participation and identity amongst other concerns Analysing a variety of cities in the Middle East the book is a significant contribution to Middle East Studies It is an essential resource for students and academics interested in Geography Regional and Urban Studies of the Middle East

The Boundaries of Jewishness in the Southern Levant 200 BCE-132 CE John Van Maaren, 2022-06-06 Recent research has considered how changing imperial contexts influence conceptions of Jewishness among ruling elites esp Eckhardt *Ethnos und Herrschaft* 2013 This study integrates other often marginal conceptions with elite perspectives It uses the ethnic boundary making model an empirically based sociological model to link macro level characteristics of the social field with individual agency in ethnic construction It uses a wide range of written sources as evidence for constructions of Jewishness and relates these to a local specific understanding of demographic and institutional characteristics informed by material culture The result is a diachronic study of how institutional changes under Seleucid Hasmonean and Early Roman rule influenced the ways that members of the ruling elite retainer class and marginalized groups presented their preferred visions of Jewishness These sometimes competing visions advance different strategies to maintain rework or blur the boundaries between Jews and others The study provides the next step toward a thick description of Jewishness in antiquity by introducing needed systematization for relating written sources from different social strata with their contexts

Schreiner, 2019-04-17. The close relationship between the Old Testament and archaeology goes without saying. However, the methodological nuances involved are often either underappreciated or ignored. Using William Dever's idea of convergence, this work attempts to flesh out details on how archaeology and Old Testament studies merge. It examines some of the most important archaeological finds to date and determines that, whether through a broad or narrow convergence, the history of research has shown that these two separate disciplines exhibit a tendency to inform one another. In the case of Old Testament studies, these convergences may even be paradigm shifting. In every case, the convergences are historically and culturally informative and therefore illuminate the depth of the biblical text.

**Cultural Heritage** Hani Hayajneh, 2023. Human heritage is an endless mine of knowledge, skills, ethos, and accomplishments which visualize and examine the power of human creativity and innovation throughout the history. The contributions cast an insight into the human psyche to perceive its Weltanschauung and its way of thinking and making artefacts associated with knowledge, existence, and identity in the context of other existing systems in the world. They demonstrate the diversity of topics as well as the state of the art of interdisciplinary approaches that participants of the Humboldt Kolleg use in their research on cultural heritage and confirm once again that the strengths of the Alexander von Humboldt Network should be celebrated and honoured. The present volume invites us to seek more novel research approaches that aim towards an understanding of the complex nature of human inheritance.

The emphasis is on Judaism rather than on Jewish studies more broadly.

**The Changing Landscape of Israeli Archaeology** Hayah Katz, 2023-07-31. Focused on the connections between archaeology and Israeli society, this book examines the development of Israeli archaeological research, taking historical, sociological, and political contexts into account.
