indicators. A service performance objective may also be expressed using a narrative description of a desired future state resulting from provision of services.

24. Service performance objectives will generally be specific, measurable, achievable, realistic and time-bound.

25. An entity's service performance objectives may all be expressed in the same type of performance indicator; for example, all expressed in outcomes. They may also be expressed in different types of performance indicators; for example, some of the service performance objectives may be expressed in outcomes, while others are expressed in outputs and/or inputs.

26. A single service may contribute to achievement of one or more service performance objectives. Several services may contribute to the same service performance objective.

Reporting Boundary

27. For reporting service performance information the reporting boundary of the entity should be the same as that used for the financial statements.

28. The performance indicators presented will be relevant to the controlling entity's own service performance objectives. Unlike consolidated financial statements, which combine the finances of controlled entities, service performance information reported by a controlling entity is not usually a combination of the services reported by its controlled entities.

Annual Reporting and Reporting Period

29. Service performance information should be reported at least annually.

30. Service performance information should cover the same reporting period as that covered by the financial statements. However, a consideration of users' needs and an assessment of costs and benefits may indicate that the reporting period should be different from that covered by the entity's financial statements. This may be the case, for example, when service performance information presented by a controlling entity is based on service performance information reported by controlled entities that have a different reporting period.

31. Service performance objectives may require periods longer than one year to achieve. Users will need information on progress towards such multi-year service performance objectives. Paragraph 53 addresses the type of service performance information that can be presented to show annual progress towards multi-year service performance objectives.

Principles for Presentation of Service Performance Information

32. An entity should present service performance information that is useful to users for accountability and decision making purposes. Presentation should enable users to assess the extent, efficiency and effectiveness of the entity's service performance. It should be appropriate to the entity's service performance objectives and make the relationship between the entity's service performance objectives and its service performance achievements clear.

33. When used in combination with the information in an entity's financial statements, service performance information should enable users to assess the entity's finances in the context of its achievement of service performance objectives and vice versa.
