Honest Answers Janelle Alberts,Ingrid Faro,2020-03-24 Somewhere between Jesus Loves Me and high school cynicism the childlike acceptance of pat answers about faith is lost often forever But while many parents find this transitional period daunting they don t want their kids to leave the Christian faith just because they didn t get good answers to how prayer works or whether dinosaurs were on Noah s ark *Honest Answers* is a discussion book to help parents tackle the God questions that make them sweat This isn t the place to come for pat answers that will make their kids nod smile and disconnect Janelle Alberts and Ingrid Faro know that when tweens start asking questions they re already old enough to understand the answers They re determined to equip parents with the language theology permission and confidence to join in the discussion and to learn how to offer deeply doctrinal answers in 140 characters or less The tween years present an incredible opportunity to build trust with kids and to keep them coming back to their parents for answers rather than finding other sources With the tools and conversational tips here mom and dad can engage in a hopeful conversation and help their children build a Christian faith to hold them steady their whole lives

Mahl,2014-02-24 First published in 1987 This book is a collection of selected papers about nonverbal and vocal behavior during clinical and investigative psychological interviews They are some of the studies conducted by students colleagues and the author over the past 35 years More than half of the papers have never been published although most of them were presented at scientific meetings The previously published papers have appeared in widely scattered places often as chapters in books This volume makes available for the first time a fairly complete presentation of a coherent body of work **User Story Mapping** Jeff Patton,Peter Economy,2014-09-05 User story mapping is a valuable tool for software development once you understand why and how to use it This insightful book examines how this often misunderstood technique can help your team stay focused on users and their needs without getting lost in the enthusiasm for individual product features Author Jeff Patton shows you how changeable story maps enable your team to hold better conversations about the project throughout the development process Your team will learn to come away with a shared understanding of what you re attempting to build and why Get a high level view of story mapping with an exercise to learn key concepts quickly Understand how stories really work and how they come to life in Agile and Lean projects Dive into a story s lifecycle starting with opportunities and moving deeper into discovery Prepare your stories pay attention while they re built and learn from those you convert to working software *Introduction to Abnormal Child and Adolescent Psychology* Robert Weis,2017-02-01 Robert Weis third edition of *Introduction to Abnormal Child and Adolescent Psychology* adopts a developmental psychopathology approach to understanding child disorders Using case studies this perspective examines the emergence of disorders over time pays special attention to risk and protective factors that influence developmental processes and trajectories and examines child psychopathology in the context of normal development Designed to be flexible via its focused modular organization the text reflects the latest changes to the DSM DSM 5 2013 and is updated with new research and developments in the field *Language Development in the Digital Age* Mila Vulchanova,Giosuè Baggio,Angelo Cangelosi,Linda Smith,2017-10-18 The digital age is changing our children s lives and childhood dramatically New technologies transform the way people interact with each other the way stories are shared and distributed and the way reality is presented and perceived Parents experience that toddlers can handle tablets and apps with a level of sophistication the children s grandparents can only envy The question of how the ecology of the child affects the acquisition of competencies and skills has been approached from different angles in different disciplines In linguistics psychology and neuroscience the central question addressed concerns the specific role of exposure to language Two influential types of

theory have been proposed On one view the capacity to learn language is hard wired in the human brain linguistic input is merely a trigger for language to develop On an alternative view language acquisition depends on the linguistic environment of the child and specifically on language input provided through child adult communication and interaction The latter view further specifies that factors in situated interaction are crucial for language learning to take place In the fields of information technology artificial intelligence and robotics a current theme is to create robots that develop as children do and to establish how embodiment and interaction support language learning in these machines In the field of human machine interaction research is investigating whether using a physical robot rather than a virtual agent or a computer based video has a positive effect on language development The Research Topic will address the following issues What are the methodological challenges faced by research on language acquisition in the digital age How should traditional theories and models of language acquisition be revised to account for the multimodal and multichannel nature of language learning in the digital age How should existing and future technologies be developed and transformed so as to be most beneficial for child language learning and cognition Can new technologies be tailored to support child growth and most importantly can they be designed in order to enhance specifically vulnerable children s language learning environment and opportunities What kind of learning mechanisms are involved How can artificial intelligence and robotics technologies as robot tutors support language development These questions and issues can only be addressed by means of an interdisciplinary approach that aims at developing new methods of data collection and analysis in cross sectional and longitudinal perspectives We welcome contributions addressing these questions from an interdisciplinary perspective both theoretically and empirically
