Love Douglas Mao Mark S Morrisson Michael North Jessica Pressman Lawrence Rainey Paul K Saint Amour Bonnie Kime Scott Urmila Seshagiri Robert Spoo and Rebecca L Walkowitz *Prosopagnosia* Davide Rivolta, 2013-09-24 This book provides readers with a simplified and comprehensive account of the cognitive and neural bases of face perception in humans. Faces are ubiquitous in our environment and we rely on them during social interactions. The human face processing system allows us to extract information about the identity, gender, age, mood, race, attractiveness, and approachability of other people in about a fraction of a second just by glancing at their faces. By introducing readers to the most relevant research on face recognition, this book seeks to answer the questions: Why are humans so fast at recognizing faces? Why are humans so efficient at recognizing faces? Do faces represent a particular category for the human visual system? What makes face perception in humans so special? Can our face recognition system fail? This book presents the author's findings on face perception during his research studies on both normal subjects and subjects with prosopagnosia, a neurological disorder characterized by the inability to recognize faces. The book describes two known forms of prosopagnosia: acquired prosopagnosia, which is the result of a brain lesion, and congenital prosopagnosia, which refers to a lifelong developmental impairment of face recognition. Written in a comprehensive and accessible style, this book addresses both experts (cognitive scientists, psychologists, neuroscientists, and computer scientists) and the general public and aims at raising awareness for a debilitating face recognition disorder such as prosopagnosia, which is often ignored or misdiagnosed as autism, with serious consequences for the affected persons and their families.

Digital Modernism Jessica Pressman, 2014-02 Digital Modernism examines how and why some of the most innovative works of online electronic literature adapt and allude to literary modernism. Digital literature has been celebrated as a postmodern form that grows out of contemporary technologies, subjectivities, and aesthetics, but this book provides an alternative genealogy. Exemplary cases show electronic literature looking back to modernism for inspiration and source material in content, form, and ideology through which to critique contemporary culture. In so doing, this literature renews and reframes rather than rejects a literary tradition that it also reconfigures to center around media. To support her argument, Pressman pairs modernist works by Pound, Joyce, and Bob Brown with major digital works like William Poundstone's *Project for the Tachistoscope* (Bottomless Pit, 2005), Young Hae Chang Heavy Industries's *Dakota*, and Judd Morrissey's *The Jew's Daughter*. With each pairing, she demonstrates how the modernist movement of the 1920s and 1930s laid the groundwork for the innovations of electronic literature. In sum, the study situates contemporary digital literature in a literary genealogy in ways that rewrite literary history and reflect back on literature's past modernism, in particular to illuminate the crucial role that media played in shaping the ambitions and practices of that period. **From Engineer to Manager** B. this frustration is the result of lack of preparation and training This book gives you a solid grounding in the critical attitudes and principles needed for success The academy ,1877 *Academy; a Weekly Review of Literature, Learning, Science and Art* ,1877 The Poetical gazette the official organ of the Poetry society and a review of poetical affairs nos 4 7 issued as supplements to the Academy v 79 Oct 15 Nov 5 Dec 3 and 31 1910 *Interdisciplinary Research* Allen F.
