Baron, 2010-03-03 In Always On Naomi S Baron reveals that online and mobile technologies including instant messaging cell phones multitasking Facebook blogs and wikis are profoundly influencing how we read and write speak and listen but not in the ways we might suppose Baron draws on a decade of research to provide an eye opening look at language in an online and mobile world She reveals for instance that email IM and text messaging have had surprisingly little impact on student writing Electronic media has magnified the laid back whatever attitude toward formal writing that young people everywhere have embraced but it is not a cause of it A more troubling trend according to Baron is the myriad ways in which we block incoming IMs camouflage ourselves on Facebook and use ring tones or caller ID to screen incoming calls on our mobile phones Our ability to decide who to talk to she argues

is likely to be among the most lasting influences that information technology has upon the ways we communicate with one another. Moreover, as more and more people are always on one technology or another, whether communicating, working, or just surfing the web or playing games, we have to ask what kind of people do we become as individuals and as family members or friends if the relationships we form must increasingly compete for our attention with digital media. Our 300-year-old written culture is on the verge of redefinition. Baron notes, "It's up to us to determine how and when we use language technologies and to weigh the personal and social benefits and costs of being always on." This engaging and lucidly crafted book gives us the tools for taking on these challenges.
