

# Study Guide

## CHAPTER 1

### Section 1. Population Dynamics (pages 10-107)

Key point: textbooks read about populations & characteristics.

Characteristics of the world's population can be described in 4 ways:

1. size (population size)  
population density

2. age (age structure)  
dependency

3. sex (sex ratio)  
gender inequality

4. growth (rate)

Some studies indicate that all populations have a history of population change.

4 types of population change: 1. natural change (births minus deaths) 2. migration (immigration minus emigration)

3. urbanization (the shift of people from rural to urban areas) 4. globalization (the process of increasing interconnectedness of the world)

1. Population change is the change in the number of people in a population over time. It is determined by the difference between the number of people born and the number of people who die.

2. Population density is the number of people living in a given area. It is calculated by dividing the total population by the total area.

Key point: textbooks read about population dynamics & characteristics.

Changes in population can be described in 4 ways: 1. size 2. age 3. sex 4. growth

Characteristic	Dependency	Gender Inequality
1. <u>Population size</u> (total number of people)		
2. <u>Age structure</u> (proportion of people in different age groups)		
3. <u>Sex ratio</u> (proportion of males to females)		
4. <u>Population density</u> (number of people per unit of area)		
5. <u>Population growth</u> (rate of increase in population size)		

Population change is the result of the difference between the number of people born and the number of people who die. It is determined by the difference between the number of people born and the number of people who die.

1. Population change is the change in the number of people in a population over time. It is determined by the difference between the number of people born and the number of people who die.

2. Population density is the number of people living in a given area. It is calculated by dividing the total population by the total area.

3. Urbanization is the process of increasing the proportion of the population living in urban areas.

4. Globalization is the process of increasing interconnectedness of the world.

5. Population change is the change in the number of people in a population over time. It is determined by the difference between the number of people born and the number of people who die.

6. Population density is the number of people living in a given area. It is calculated by dividing the total population by the total area.

7. Urbanization is the process of increasing the proportion of the population living in urban areas.

8. Globalization is the process of increasing interconnectedness of the world.
