### Analysis and Conclusions

1. What happened to your knee when it was tapped?
2. Could you prevent the knee jerk or the pupil contraction? Explain your answer.
3. What happened to the pupil of the eye that was closed to the light?
4. How does the amount of light affect the pupils?
5. From your observations, how would you classify the knee-jerk and the pupillary response? Explain your reason.
6. Is catching the meter stick a voluntary reaction or a reflex? Explain your answer.
7. What was the average distance the meter stick fell in your four trials? Show your work.
8. Why is a reflex reaction generally quicker than a voluntary (non-reflex) response?
9. How is it possible that a person could become quicker at performing a voluntary response?

Wickramasuriya, Rose T. Faghih, 2024-03-29 This book serves as a tutorial that explains how different state estimators Bayesian filters can be built when all or part of the observations are binary The book begins by briefly motivating the need for point process state estimation followed by an introduction to the overall approach as well as some basic background

material in statistics that are necessary for the equation derivations that are utilized in subsequent chapters The subsequent chapters focus on different state space models and provide step by step explanations on how to build the corresponding Bayesian filters Each of the main chapters that describes a single state space model also describes the corresponding MATLAB code examples at the end Descriptions are also provided regarding the code The code contains both simulated and experimental data examples All the experimental data examples are taken from real world experiments The experiments involve the recording of skin conductance heartrate and blood cortisol data A MATLAB toolbox of code examples that cover the different filters covered in the book is included in a companion webpage The book is primarily intended for graduate students in either electrical engineering or biomedical engineering who will be beginning research in state estimation related to point process data or mixed data i e point processes and other types of observations The book can also be used by practicing researchers who measure skin conductance and heart rate or pulsatile hormones in their own work e g in psychology This is an open access book
