2018 Joint Trauma System (JTS) Clinical Practice Guidelines (CPGs) & DOD TRAUMA REGISTRY DATA DICTIONARY For Military and Civilian Health Care Practitioners, 2018-10-09 Almost 1 000 total pages see index at beginning of publications for a complete list of included CPGs Each CPG includes a section on the following 1 GOAL 2 BACKGROUND 3 EVALUATION 4 TREATMENT 5 PERFORMANCE IMPROVEMENT PI MONITORING 6 SYSTEM REPORTING reduced burn morbidity and mortality near elimination of extremity compartment syndrome better patient care documentation and improved communication across the spectrum of care between geographically dispersed facilities CPGs are evidence based and developed with experts in the military and civilian communities deployed clinicians Service trauma surgical consultants JTS leadership and formerly deployed Trauma Directors and Coordinators JTS has a formalized process for developing reviewing updating and approving CPGs The guidelines are developed and implemented by clinical subject matter experts in response to needs identified in the military area of responsibility CPGs were developed originally for U S Central Command However collaborative efforts are ongoing with the other Combatant Commands to customize CPGs to

their COCOMs

INTRODUCTION TO THE JOINT TRAUMA SYSTEM JTS

The Joint Trauma System JTS is the Department of Defense DoD authority for the military's trauma care system. The vision of the Joint Trauma System is that every Soldier, Sailor, Marine, and Airman injured on the battlefield will have the optimum chance for survival and maximum potential for functional recovery. To achieve this vision, in 2006, the JTS implemented programs for data-driven trauma system development and improvement in addition to the collection of trauma data. As part of its data collection efforts, the JTS maintains a registry of trauma patients who received care at medical treatment facilities (MTFs). Since 2007, this registry, known as the DoD Trauma Registry (DoDTR), has documented demographic, injury, treatment, and outcomes data for all trauma patients admitted to any DoD MTF, regardless of whether the injury occurred during ongoing military operations and is the largest military trauma data source in the world. Development of the DoDTR began during the early years of the Global War on Terror (GWOt) when the need to systematically improve trauma care for combat-wounded resulted in the impromptu creation of a demonstration registry known then as the Combat Trauma Registry (CTR). The CTR was constructed by the Center for AMEDD Strategic Studies (CASS); trauma-related information was initially abstracted into it from paper medical records received from trauma nurse coordinators (TNCs) at Landstuhl Regional Medical Center (LRMC) in Germany. Shortly after the demonstration program started, the Army Surgeon General approved its transition to an operational mode, leading to the formation of the Joint Theater Trauma System (JTTS) and eventually the Joint Trauma System (JTS).

Clinical Practice Guidelines for Midwifery & Women's Health

Tharpe, Cindy L. Farley, Robin G. Jordan, 2016-05-20. Clinical Practice Guidelines for Midwifery Women's Health Fifth Edition is an accessible and easy-to-use quick reference guide for midwives and women's healthcare providers. Completely updated and revised to reflect the changing clinical environment, it offers current evidence-based practice, updated approaches, and opportunities for midwifery leadership in every practice setting. Also included are integrative, alternative, and complementary therapies. The Fifth Edition examines the transition to the use of ICD-10 codes, women's health policy, and advocacy, risk assessment, and decision making in practice, and inspiring trust in midwifery care. New clinical practice guidelines include health promotion and primary care practice, such as promoting restorative sleep, optimizing oral health, promoting a healthy weight, and caring for the woman with a substance abuse disorder.
